SKU:

Categories: Airway Management Adult

Product Description

TruCric is a lightweight and durable cric trainer for efficient teaching and training in needle and surgical cricothyrotomy, percutaneous tracheostomy, air jet ventilation and the Seldinger technique.

Model Features

- Lightweight and durable cricothyrotomy trainer designed for efficient procedure training
- Palpable cricoid landmarks, laryngeal cartilages & tracheal rings provide positive user feedback with easy identification of the sternal notch & the clavicle bone
- Correct technique verification with replaceable lung bag
- Neck skin can be rotated on the model allowing 10-15 incisions
- Larynx insert allows 1 surgical cricothyroidotomy & 2-3 tracheostomy procedures
- All consumables are quick & easy to interchange, perfect for a busy teaching environment

Medical Procedure Training

- Needle & surgical cricothyrotomy
- Air jet ventilation
- Percutaneous tracheostomy
- Seldinger technique
- FONA airway management

Surgical Cricothyrotomy Trainer Real -Feel skin covering & palpable cricoid landmarks for realistic training. TruCric facilitates training in needle and surgical cricothyrotomy, percutaneous tracheostomy, Seldinger technique and air jet ventilation. Anatomically accurate and palpable landmarks include tracheal rings, laryngeal cartilages, cricoid and cricothyroid membrane for realistic practice in front of neck access techniques. Our TruCric model is a durable front of neck access trainer facilitating realistic practice in FONA airway management, including needle and surgical cricothyroidotomy, and percutaneous tracheostomy. It's ideal for efficient training including emergency and anaesthesia clinicians needing to maintain proficiency in emergency front of neck airway techniques. TruCric provides efficient surgical airway management training ideal for busy classroom settings and as a surgical airway demonstration model.
