SKU:

Categories: Rescue Training

Product Description

Designed with the help of the International Association of Fire Fighters. Developed for lifelike adult or juvenile patient handling, transportation, and extrication training. This manikin can be safely used in situations too hazardous or uncomfortable for human volunteers. Made of tough cast vinyl with zinc-plated steel frame for longevity and rugged use. Manikin is fully articulated for positioning in widely diversified training environments. The manikin can be positioned in a smoke-filled room, and immobilized on a stretcher for mountain rescue instruction. Used by the U.S. Military, Fire, and Police Departments, Safety Teams, and Emergency Personnel for rescue and extrication from pole tops, confined spaces, collapsed buildings, smoke rooms, and ladder carry-down protocols worldwide. Perfect to use with the Manikin Moulage Kit for casualty simulation. Includes additional reinforcement to increase durability. Made of durable vinyl with 4,100-lb. test plastic-coated cables. Features include: articulated joints and weight distribution according to human weight distribution chart. Clothing not

included. 6 ft. tall.

I.A.F.F. Rescue Randy (with Additional Reinforcement) — Nasco Healthcare Rescue & Extrication Manikin for India

The I.A.F.F. Rescue Randy with Additional Reinforcement (Item No. 149-1475U, Brand: Nasco Healthcare, USA) was designed with input from the International Association of Fire Fighters for lifelike adult or juvenile patient handling, transportation, and extrication training — built to withstand the rigors of realistic rescue drills that would be unsafe or impractical with human volunteers.

Constructed from tough cast vinyl with a zinc-plated steel frame, this reinforced version adds extra durability for repeated, heavy-duty use. The manikin is fully articulated, allowing positioning across diverse training scenarios — from smoke-filled rooms to stretcher immobilization for mountain rescue instruction. It's used by the U.S. Military, Fire and Police Departments, Safety Teams, and Emergency Personnel worldwide for rescue and extrication from pole tops, confined spaces, collapsed buildings, smoke-filled rooms, and ladder carry-down protocols.

The manikin pairs well with a Manikin Moulage Kit for casualty simulation training, and features 4,100-lb test plastic-coated cables along with weight distribution modeled on a human weight distribution chart. Clothing is not included.

Specifications: Height 183 cm (6 ft). Weight 74.8 kg. Brand: Nasco Healthcare, USA.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying emergency and rescue training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

FAQ Q: What makes this manikin different from the standard Rescue Randy? **A:** It includes additional reinforcement — a zinc-plated steel frame and 4,100-lb test cables — for extra durability under heavy, repeated training use, and was developed with input from the International Association of Fire Fighters.

Q: Can this manikin be used with a moulage kit? **A:** Yes, it pairs well with a Manikin Moulage Kit for casualty simulation training.

Q: How do I order from SEM Trainers? **A:** Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
