Adult Airway Management Trainer

Item No. LF03602U

Weight 5kg

Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories: Airway Management Adult

Product Description

The **Life/form®** Airway Management Trainer simulates a nonanesthetized patient for practicing intubation, ventilation, suction, and CPR techniques. Realistic anatomy and landmarks including teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, esophagus, and stomach. The trainer allows you to practice oral, digital, and nasal intubation, as well as E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., and Combitube® insertion. Allows jaw thrust technique. Suction techniques and proper cuff inflation may also be practiced and evaluated. Features durable, rugged, one-piece construction and bifurcated lungs. Head represents a small adult, making it ideal for practicing more difficult approaches and for training purposes. CPR and Airway Management procedures may be performed. Mounted on CPARLENE® Basic Torso. Manual carotid pulse. Includes pump spray lubricant and disposable lower airway for manikin. Hard carry case not included.

Why Choose the Life/form® Adult Airway Management Trainer (LF03602U) for Your Simulation Lab in India?

The Life/form® Adult Airway Management Trainer (Item No. LF03602U / 1017871) by Nasco Healthcare, USA is a 5 kg adult airway management and CPR training platform — a small adult female head mounted on the CPARLENE® Basic Torso — specifically designed for difficult airway training and combined airway management and CPR skill sessions. It is the only torso-with-head configuration in the Life/form® Airway Management Trainer family that features a female head, making it the correct choice for simulation labs that need to train on both male and female patient presentations. From the family comparison table, this configuration supports the complete advanced airway device set — ET, EOA, PTL, LMA, EGTA, and Combitube® insertion — alongside digital intubation, oral and nasal intubation, suctioning, jaw thrust, and manual carotid pulse, all in a torso format that also accommodates CPR training.

The anatomically realistic airway presents teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, oesophagus, and stomach — the complete upper and lower airway landmark set that trainees must identify and navigate correctly during intubation. The small adult female head presents slightly more challenging airway geometry than a standard adult male, making this the appropriate choice for programmes where difficult airway scenarios — narrower oral aperture, smaller anatomical landmarks — are a curriculum objective. The durable one-piece construction and bifurcated lungs provide reliable bilateral auscultation confirmation of correct tube placement. Proper cuff inflation technique can be practised and evaluated. The CPARLENE® Basic Torso mount allows combined airway and CPR sessions without the need for a separate manikin. Includes pump spray lubricant and disposable lower airway; hard carry case is not included and must be sourced separately.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What makes this configuration different from other Life/form® Adult Airway Management Trainers? A: This is the only configuration in the family with a female head mounted on a torso, making it ideal for difficult airway training and for programmes that train on both male and female patient presentations. It supports the full advanced airway device set, digital intubation, jaw thrust, suctioning, manual carotid pulse, and CPR — all on the same platform.

Q: Is the hard carry case included? A: No. The hard carry case is not included with LF03602U and must be purchased separately. The trainer includes pump spray lubricant and a disposable lower airway.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

	Head/torso	Ideal for	Digital intubation	Laryngospasm & Tongue edema	Stomach rise	Suctioning	Jaw thrust	Manual carotid pulse	E.T., E.O.A., P.T.L, L.M.A., Combitube®, and King System insertion	Additional features
