SKU:

Categories: Rescue Training

Product Description

This manikin is designed to be customized by the user for optimal training use. The Rescue Randy 9000 is made from rugged polyethylene parts that allow for the addition of varying amounts of weight to each of the pieces. You may add water, sand, or any other substance as long as you can empty the substance out of the parts. The empty manikin is easily moved and stored when training is completed.

This custom-molded construction ensures constant size from one manikin to the next and allows the utilization of Randy 9000 in every environment imaginable. Each sealed piece is assembled with stainless steel hardware. The range of motion of the joints, including bending at the waist, mimics real life. Randy 9000 is perfect for RIT or Combat Challenge as well as ship-board, heavyweight, horizontal rescues or lightweight packaging exercises like spinal immobilization. Randy 9000 may be used in all weather conditions and the joint design protects rescuer's fingers. Weight with water: 170 lbs Weight with sand: 250 lbs

Rescue Randy 9000 (Nasco Healthcare) — Customizable Weighted Rescue Training Manikin for India

The Rescue Randy 9000 (Item No. 149-9000U, Brand: Nasco Healthcare, USA) is a customizable rescue manikin built from rugged polyethylene parts that trainers can fill with water, sand, or another substance to adjust training weight — as long as the fill material can be emptied out afterward. Empty, the manikin is easy to move and store between sessions.

Custom-molded construction keeps size consistent from one unit to the next, and each sealed piece is assembled with stainless steel hardware. The joint range of motion — including bending at the waist — mimics real human movement, and the joint design protects rescuers' fingers during handling.

The Rescue Randy 9000 suits RIT (Rapid Intervention Team) training, Combat Challenge events, shipboard rescues, heavyweight horizontal rescues, and lightweight packaging exercises such as spinal immobilization. It can be used in all weather conditions.

Specifications: Weight (empty) 30.6 kg. Weight (filled with water) approx. 170 lbs / 77 kg. Weight (filled with sand) approx. 250 lbs / 113 kg. Brand: Nasco Healthcare, USA.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying emergency and rescue training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

FAQ Q: Can the training weight be adjusted? **A:** Yes — fill with water for approx. 170 lbs (77 kg) or sand for approx. 250 lbs (113 kg), or leave empty at 30.6 kg for easy storage and transport.

Q: What training scenarios is it suited for? **A:** RIT training, Combat Challenge events, shipboard rescues, heavyweight horizontal rescues, and lightweight packaging exercises like spinal immobilization.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
