Product Description

This manikin of a 6-9 months old infant allows Coast Guards, Lifeguard Trainers and Emergency Personnel to train water rescue and retrieval. When filled with water the manikin has a weight of 5.5 kg and will sink to the bottom.

Infant Water Rescue Manikin, 6–9 Months (Nasco Healthcare) for Lifeguard & Emergency Rescue Training in India

The Infant Water Rescue Manikin (Item No. 149-1352U, Brand: Nasco Healthcare, USA) represents an infant aged 6 to 9 months, giving Coast Guards, lifeguard trainers, and emergency personnel a realistic subject for practicing infant water rescue and retrieval — a scenario with distinct handling and technique requirements compared to adult or child rescue.

Dry weight is 1.65 kg; when filled with water, the manikin reaches approximately 5.5 kg and sinks to the bottom, allowing trainers to simulate full-submersion infant rescue drills under realistic conditions.

Specifications: Weight (dry) 1.65 kg; weight (filled with water) approx. 5.5 kg. Brand: Nasco Healthcare, USA.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying emergency rescue and simulation training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

FAQ Q: Who is this manikin designed for? **A:** Coast Guards, lifeguard trainers, and emergency personnel training in infant (6–9 months) water rescue and retrieval.

Q: How much does the manikin weigh when filled with water? **A:** Approximately 5.5 kg when filled, enabling full-submersion rescue training; dry weight is 1.65 kg.

Q: How do I order from SEM Trainers? **A:** Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
