SKU:

Categories:Water Rescue Training

Product Description

This manikin of a 3 year old child allows Coast Guards, Lifeguard Trainers and Emergency Personnel to train water rescue and retrieval. When filled with water the manikin has a weight of 9 kg and will sink to the bottom. This child water rescue manikin is a great tool for teaching life saving techniques.

Child Water Rescue Manikin, 3 Years Old (Nasco Healthcare) for Lifeguard & Emergency Rescue Training in India

The Child Water Rescue Manikin (Item No. 149-1351U, Brand: Nasco Healthcare, USA) represents a 3-year-old child, giving Coast Guards, lifeguard trainers, and emergency personnel a realistic subject for practicing child water rescue and retrieval techniques.

Dry weight is 2.7 kg; when filled with water, the manikin reaches approximately 9 kg and sinks to the bottom, allowing trainers to simulate full-submersion child rescue scenarios — a critical and often under-trained skill set given the physical and procedural differences between adult and pediatric water rescue.

Specifications: Weight (dry) 2.7 kg; weight (filled with water) approx. 9 kg. Brand: Nasco Healthcare, USA.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying emergency rescue and simulation training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

FAQ Q: Who is this manikin designed for? **A:** Coast Guards, lifeguard trainers, and emergency personnel training in child (age 3) water rescue and retrieval.

Q: How much does the manikin weigh when filled with water? **A:** Approximately 9 kg when filled, enabling full-submersion rescue training; dry weight is 2.7 kg.

Q: How do I order from SEM Trainers? **A:** Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
