Categories: Water Rescue Training

Product Description

This manikin of an adolescent allows Coast Guards, Lifeguard Trainers and Emergency Personnel to train water rescue and retrieval as well as for adolescents. The manikin has articulated joints and is made of durable plastic and rust-resistant steel. When filled with water the manikin will submerge to the

neck, if an additional 3 kg (a brick will do) is added, it will sink completely.

Adolescent Water Rescue Manikin, 121 cm (Nasco Healthcare) for Lifeguard & Emergency Rescue Training in India

The Adolescent Water Rescue Manikin (Item No. 149-1327U, Brand: Nasco Healthcare, USA) is built for Coast Guard units, lifeguard trainers, and emergency personnel to practice water rescue and retrieval techniques on an adolescent-sized subject.

The manikin features articulated joints and is constructed from durable plastic with rust-resistant steel components for repeated submersion use. When filled with water, it submerges to the neck; adding roughly 3 kg of extra weight (such as a brick) allows it to sink fully, enabling realistic full-submersion retrieval drills.

Specifications: Dimensions 125 x 40 x 23 cm. Weight 11 kg. Brand: Nasco Healthcare, USA.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying emergency rescue and simulation training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

FAQ Q: Who is this manikin designed for? A: Coast Guards, lifeguard trainers, and emergency personnel training in adolescent water rescue and retrieval.

Q: How does the submersion feature work? A: Filled with water, the manikin submerges to the neck; adding about 3 kg of extra weight sinks it completely for full-submersion rescue drills.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
