**SKU:**

**Categories:**ALS Adult

## Product Description

These scenarios allow you to implement a new program or complement an existing program as quickly as possible. Patient stats provided in the initial scenarios also provide the basic building blocks for more advanced scenarios that your organization can create independently.

**These scenarios are in field and transport settings:**

- Asthmatic patient
- Diabetic patient
- Cerebrovascular accident
- Hunting accident with gunshot wound and tension pneumothorax
- Motor vehicle accident with multiple traumatic injuries
- Motor vehicle accident with internal bleeding and hypovolemic shock
- Mildly traumatic brain injury
- Chest pain patient
- Ventricular fibrillation

- Asystole

## Why Choose the EMS Scenario Package for SMART STAT for Your Simulation Lab in India?

The EMS Scenario Package for SMART STAT (Item No. 1018578, MPN: 101-455U) by Nasco Healthcare, USA is a ready-to-use clinical scenario library designed specifically for the Simulaids SMART STAT ALS simulator. Weighing 3.5 kg, it provides 10 pre-built EMS scenarios in field and transport settings — allowing simulation labs, paramedic training institutes, and emergency medicine departments to launch structured, scenario-based training on their SMART STAT immediately, without the time and expertise required to build scenarios from scratch. Each scenario comes with patient statistics that also serve as building blocks for more advanced, customised scenarios that instructors can develop independently over time.

The 10 included scenarios cover the breadth of pre-hospital and emergency medicine presentations that ALS-trained professionals encounter in the field: an asthmatic patient, a diabetic patient, a cerebrovascular accident, a hunting accident with gunshot wound and tension pneumothorax, a motor vehicle accident with multiple traumatic injuries, a motor vehicle accident with internal bleeding and hypovolemic shock, a mildly traumatic brain injury, a chest pain patient, ventricular fibrillation, and asystole. Each scenario is set in a field or transport context — replicating the pre-hospital environment where paramedics and emergency medical technicians operate — rather than a hospital room. This makes the package particularly relevant for paramedic and EMT training programmes, disaster response team training, and military medical training units across India, as well as ATLS and ACLS programmes that incorporate pre-hospital assessment scenarios.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of Nasco Healthcare and Simulaids products in India with over 30 years of experience supplying medical simulators and accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

## Frequently Asked Questions

**Q: Which SMART STAT simulator is this scenario package compatible with?** A: This package is designed for use with the Simulaids SMART STAT ALS simulator (Basic and Complete configurations) by Nasco Healthcare.

**Q: Can these scenarios be modified or expanded?** A: Yes. The patient statistics provided in each scenario are designed as building blocks — instructors can use them as the foundation for more advanced or customised scenarios that their organisation creates independently.

**Q: How do I order and get support from SEM Trainers?** A: Contact us at [sem@semtrainers.com](mailto:sem@semtrainers.com) or call +91-88495 63724. We supply genuine Nasco Healthcare products with pan-India delivery.
