**SKU:**

**Categories:**ALS Adult

## Product Description

Now you can convert your current CPARLENE® into a state-of-the-art resuscitation manikin. This resuscitation package allows you to simulate resuscitation, along with the ability to start IVs, check and evaluate blood pressure, perform defibrillation and CPR, and practice airway management skills including intubation and suction. The update package includes the Life/form® IV Arm, Blood Pressure Arm, Airway Management Trainer Head with carotid pulse, and Defibrillation Chest Skin, all of which can be attached to either CPARLENE®

### Why Choose the Complete CRiSis™ Update Package for Your Simulation Lab in India?

The Complete CRiSis™ Update Package (Item No. 1019784, MPN: LF03959) by Nasco Healthcare, USA is the most cost-effective path to upgrading an existing Life/form® CPARLENE® manikin into a

full-featured Advanced Life Support resuscitation trainer — without purchasing an entirely new simulator. For simulation labs across India that already own a CPARLENE® and want to expand their ALS training capability, this package delivers precisely the components that transform a basic CPR manikin into a multi-skill resuscitation platform in a single purchase.

The package includes four key upgrade components that attach directly to either CPARLENE® configuration. The Life/form® IV Arm adds intravenous access training with antecubital and dorsal vein cannulation capability. The Blood Pressure Arm enables auscultatory blood pressure assessment training with all five Korotkoff phases. The Airway Management Trainer Head with carotid pulse supports oral, nasal, and digital intubation, suction technique, and palpable carotid pulse for patient assessment. The Defibrillation Chest Skin enables use of real defibrillator equipment — including AEDs and manual defibrillators — directly on the manikin's chest. Together, these four components add IV access, blood pressure, advanced airway management, and defibrillation to whatever CPR capability your CPARLENE® already provides — covering the full ALS skill set required for ACLS training programmes and NMC-mandated simulation labs in Indian medical colleges.

This upgrade package is the right choice for institutions that have invested in a CPARLENE® and want to extend its useful life and training scope rather than replace it, and for labs building out ALS capability incrementally within a constrained capital budget.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and accessories to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation and setup support, and dedicated after-sales service. All products carry genuine manufacturer warranty.

## Frequently Asked Questions

**Q: Which CPARLENE® models is this update package compatible with?** A: This Complete CRiSis™ Update Package is compatible with both CPARLENE® configurations — all four included components attach to either version of the CPARLENE® manikin.

**Q: Does this package include the CPARLENE® manikin itself?** A: No. This is an upgrade accessory package for existing CPARLENE® owners. The CPARLENE® manikin must be purchased separately.

**Q: What is the warranty and how do I get support?** A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at [sem@semtrainers.com](mailto:sem@semtrainers.com) or call +91-88495 63724.
