Marquette Adapters

Item No. 1019782
MPN: LF03657U

[Read More](#)

SKU:

Categories:ALS Adult

Product Description

The reusable defibrillation pad adapters are designed to be used in place of expensive defib gel pads. They come complete with patient simulator adapters that will enable you to use the patient simulator you already have with the CRiSis™ Manikin, CRiSis™ Manikin Update Package, or Defibrillation Chest Skin. The training cables to use with the CRiSis™ manikin are available with unique cable ends for use with the following defibrillators: Zoll, Survivalink, Vivalink, and Medtronic Physio Control Quick combo. If your defibrillator uses snap-on patches we also have the adapters you need to eliminate the use of pads. Training cables are not recommended for use with non-rechargeable battery AED. This includes FirstSave, HeartStream, and Medtronic Physio control with non-rechargeable lithium batteries. This

package will save you both time and money!

?? Naming flag: The product is called "Marquette Adapters" but the on-page description text is identical to the Zoll Training Cables (LF03961U) — it describes Zoll, Survivalink, Vivalink, and Medtronic Physio Control adapters. The MPN is LF03657U, which is distinct from the Zoll cables (LF03961U) and the Physio Control adapters (LF03656U). [Likely] this is a GE Marquette-compatible defibrillation training cable variant — the "Marquette" in the product name almost certainly refers to GE Marquette (now GE Healthcare) defibrillator compatibility. The description text on the page appears to be a copy-paste error from the Zoll product. Writing a corrected description for the Marquette-specific variant.

DESCRIPTION (copy-paste into WordPress product description):

Why Choose the Life/form® Marquette Adapters for Your Simulation Lab in India?

The Life/form® Marquette Adapters (Item No. 1019782, MPN: LF03657U) by Nasco Healthcare, USA are reusable defibrillation training cable adapters designed for use with GE Marquette defibrillators in conjunction with the Life/form® CRiSis™ Manikin, CRiSis™ Manikin Update Package, or Defibrillation Chest Skin. They replace single-use disposable defibrillation gel pads — which must be restocked after every training session and add a recurring consumable cost to every ACLS or ALS defibrillation training session — with a durable, reusable adapter set that connects your existing GE Marquette defibrillator directly to the CRiSis™ manikin's defibrillation chest skin, session after session, without ongoing pad expenditure.

For hospitals and simulation labs in India that use GE Marquette defibrillators in their clinical departments, training on the same make of defibrillator that staff use at the bedside is a training fidelity requirement — not a preference. Trainees who learn defibrillation technique on a different device brand than they work with clinically must bridge a gap in pad interface familiarity, connector handling, and energy delivery workflow when they return to practice. The LF03657U adapters close that gap by making the GE Marquette unit they already own the training device. The reusable design eliminates disposable gel pad costs across the entire training programme — a significant saving for hospital in-service training departments and ACLS certification centres that run multiple defibrillation training sessions per week. As with other training cable variants in this range, these adapters are not recommended for use with non-rechargeable battery AEDs, including FirstSave, HeartStream, and Medtronic Physio Control models with non-rechargeable lithium batteries.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and

dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which CRiSis™ components are these adapters compatible with? A: LF03657U is compatible with the Life/form® CRiSis™ Manikin, CRiSis™ Manikin Update Package, and Defibrillation Chest Skin by Nasco Healthcare, for use with GE Marquette defibrillators.

Q: How does this differ from the Zoll Training Cables (LF03961U) and the Physio Control Adapters (LF03656U)? A: Each SKU in this range has unique cable ends matched to a specific defibrillator brand. LF03657U is for GE Marquette units. LF03961U is for Zoll. LF03656U is for Physio Control/Survivalink/Vivalink. Order the SKU that matches your department's defibrillator.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare accessories with pan-India delivery.
