SKU:

Categories:ALS Adult

Product Description

Why Choose the Complete Compression Unit for 1005650 for Your Simulation Lab in India?

The Complete Compression Unit for 1005650 (Item No. 1019771, MPN: LF03340U) by Nasco Healthcare, USA is the genuine OEM replacement compression unit for the Life/form® ALS simulator (Item No. 1005650). The chest compression mechanism is one of the most mechanically stressed components in any ALS manikin — high-frequency, high-force use in intensive training programmes causes wear over time that progressively degrades compression depth feedback, chest recoil, and the tactile realism that CPR training depends on. Replacing the compression unit with this genuine OEM part restores the simulator to full factory specification, ensuring trainees continue to receive accurate resistance and recoil feedback during chest compression practice.

Using a degraded or non-OEM compression unit in CPR training is a meaningful problem: trainees calibrate their compression force and technique against the resistance they feel. If the unit is worn, they may develop habits — insufficient depth, incomplete recoil — that transfer incorrectly to real resuscitation. Maintaining the compression unit with genuine Nasco Healthcare parts is therefore not just a maintenance decision but a training quality decision. This replacement is compatible specifically with the Life/form® ALS simulator 1005650 and should be sourced only through an authorized distributor to ensure genuine OEM specification.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM spare parts to 1,500+ institutions across 28 states. We stock genuine replacement parts — not third-party alternatives — and provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Which simulator is this compression unit compatible with? A: This is the genuine OEM replacement compression unit for the Nasco Healthcare Life/form® ALS simulator, Item No. 1005650.

Q: How do I know when the compression unit needs replacing? A: Signs include reduced chest compression depth, loss of tactile resistance, incomplete chest recoil, or visible mechanical wear. If training feedback is inconsistent with expected performance, the compression unit should be inspected and replaced.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare spare parts with pan-India delivery.
