Replacement vein kit for SMART STAT ALS simulators

Item No. 101-367

Weight 0.039kg

Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories:ALS Adult

Product Description

Replacement vein kit for the advanced life support (ALS) simulators SMART STAT Basic and Complete.

Why Choose the Replacement Vein Kit for SMART STAT ALS Simulators for Your Simulation Lab in India?

The Replacement Vein Kit for SMART STAT ALS Simulators (Item No. 101-367) by Nasco Healthcare, USA is the genuine OEM replacement vein set for the IV arm module on the Simulaids SMART STAT Basic and SMART STAT Complete ALS simulators. Weighing just 0.039 kg, this kit contains the vein tubing that runs through the IV arm — the component that provides flashback, enables antecubital and dorsal cannulation training, and delivers the tactile feedback of entering a vessel during IV access skill

development.

The vein tubing is the highest-wear component of any IV training arm. Each needle insertion punctures the vein wall, and over repeated sessions the cumulative micro-perforations cause the vein to lose its ability to produce consistent flashback, hold fluid in the correct channel, and provide the correct resistance when a needle enters the lumen. A vein that has degraded past its service life will deliver inconsistent or absent flashback — which means trainees cannot rely on the feedback they are training to recognise as confirmation of intraluminal placement. This directly compromises the quality of IV access skill development. Replacing the veins promptly with the genuine OEM 101-367 kit restores correct flashback behaviour and vein palpability. This kit is distinct from the IV Replacement Arm Skin (140-390) — the skin and veins are separate consumables that degrade at different rates and must be stocked and replaced independently. For simulation labs running high-frequency IV access training sessions on the SMART STAT, keeping both consumables in stock is the correct approach.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare and Simulaids products in India with over 30 years of experience supplying medical simulators and genuine OEM consumables to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which SMART STAT simulators is this vein kit compatible with? A: Item No. 101-367 is the replacement vein kit for the IV arm module on the Simulaids SMART STAT Basic and SMART STAT Complete ALS simulators by Nasco Healthcare.

Q: What is the difference between this vein kit and the IV Replacement Arm Skin (140-390)? A: These are separate consumables. The vein kit (101-367) replaces the internal vein tubing that provides flashback and cannulation resistance. The arm skin (140-390) replaces the outer skin through which needles are inserted. Both degrade independently and should be stocked and replaced separately.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare consumables with pan-India delivery.
