SKU:

Categories:ALS Adult

Product Description

Transport rescue head for full-body trauma cpr manikins (1018871)

Why Choose the Transport Rescue Head for Your Simulation Lab in India?

The Transport Rescue Head (Item No. 1020119, MPN: PP02704U) by Nasco Healthcare, USA is a genuine OEM replacement and optional upgrade head designed for use with the Full-Body CPR Manikin with Trauma Options (1018871). It enables the manikin to be configured for transport and rescue breathing training scenarios — simulating the conditions under which paramedics, first responders, and ALS-trained teams perform airway management and ventilation during patient movement, evacuation, or pre-hospital transport rather than in a static lab setting. Swapping to the Transport Rescue Head converts the same manikin body into a platform for practising BVM ventilation,

rescue breathing positioning, and airway management in dynamic or space-constrained training environments.

The value of a transport-specific head is training fidelity in context. Rescue breathing during patient extrication, ambulance transport, or confined-space evacuation presents different ergonomic and technique challenges than stationary lab training — head positioning, mask seal, and ventilation rate must be maintained while the rescuer and patient are both in motion or in constrained positions. Training these skills on the same full-body manikin used for trauma and CPR skill development — simply by swapping the head — avoids the need for a separate dedicated transport training manikin and allows instructors to integrate rescue breathing in transport scenarios directly into existing ATLS, TCCC, and ALS curricula. Only the genuine OEM PP02704U head guarantees correct fit and neck attachment compatibility with the 1018871 manikin body.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which manikin is this Transport Rescue Head compatible with? A: This head (PP02704U, Item No. 1020119) is designed for the Full-Body CPR Manikin with Trauma Options (Item No. 1018871) by Nasco Healthcare.

Q: Does this head support advanced airway management such as intubation? A: This is a transport rescue head designed for rescue breathing and BVM ventilation training in field and transport scenarios. For advanced airway management including intubation, the standard CPR and airway management head configurations are appropriate.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare accessories with pan-India delivery.
