**SKU:**

**Categories:**ALS Adult

## Product Description

Replacement combo larynx for use with AirSim models

### Why Choose the Replacement Combo Larynx for Your Simulation Lab in India?

The Replacement Combo Larynx (Item No. 1019397, MPN: CL200) is a 0.99 kg genuine OEM replacement larynx consumable designed for use with AirSim airway management models. The combo larynx insert features simulated cricoid and laryngeal cartilages with palpable tracheal rings — providing trainees with the correct anatomical landmarks and the correct tissue resistance during both intubation and surgical airway incision training. When the larynx degrades from repeated use, replacing it with the genuine CL200 insert restores full training fidelity to the AirSim model.

The clinical value of a high-quality larynx insert is precisely in what trainees feel, not just what they see. Correct palpation of the cricoid cartilage is the foundation of the Sellick manoeuvre and the key landmark for cricothyrotomy incision placement. A worn or deformed larynx insert that no longer presents clear, palpable cartilage landmarks trains incorrect technique — trainees develop a spatial memory of landmark location that will not transfer correctly to a real patient airway. The CL200 combo larynx restores the lifelike resistance during incision training and the correct cartilage palpability that makes the difference between a meaningful surgical airway skill session and one that simply goes through the motions. For simulation labs running high-frequency airway management and difficult airway courses — anaesthesiology skills labs, emergency medicine departments, ATLS centres — maintaining a stock of the CL200 replacement insert prevents training quality from degrading between scheduled maintenance cycles.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of Trucorp AirSim products in India with over 30 years of experience supplying airway management simulators and genuine OEM consumables to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

### Frequently Asked Questions

**Q: Which AirSim models is this replacement larynx compatible with?** A: The CL200 Replacement Combo Larynx is designed for use with Trucorp AirSim airway management models. Contact us to confirm compatibility with your specific AirSim configuration before ordering.

**Q: What makes the "combo" larynx different from a standard replacement larynx?** A: The combo larynx combines simulated cricoid and laryngeal cartilages with palpable tracheal rings in a single insert — supporting both standard intubation landmark training and surgical airway (cricothyrotomy) incision training in one component.

**Q: How do I order and get support from SEM Trainers?** A: Contact us at [sem@semtrainers.com](mailto:sem@semtrainers.com) or call +91-88495 63724. We supply genuine Trucorp AirSim consumables with pan-India delivery.
