SKU:

Categories:ALS Adult

Product Description

AirSim Bronchi is a durable airway management trainer for intubation and bronchoscopy. This model includes the AirSim® airway with true, anatomically correct and visually accurate internal features including bronchi down to the fourth generation. This training manikin can also be used to practice nasotracheal intubation and nasally directed fiberoptic examination.

Model Features

- Anatomically correct internal features and visually accurate landmarks in airway and nasal passage created from CT DICOM data

- Anatomically correct internal bronchi down to the fourth generation
- Inflatable tongue with lifelike texture can simulate edema
- Replaceable lung bags inflate with successful ventilation

Medical Procedure Training

- Diagnostic bronchoscopy
- Single naso-tracheal intubation
- Bag-valve mask (BVM) ventilation techniques
- Full range of supraglottic device insertion
- Direct laryngoscopy
- Awake fiber optic examination
- Endotracheal tube insertion
- Combi tube insertion
- Single lung isolation techniques

Bronchoscopy Trainer Ideal for Teaching Intubation and Lung Isolation

The AirSim Bronchi provides exceptional detail in both internal and external features for a more realistic training experience. The carina, bronchus and bronchioles can be clearly identified when training on the use of a fiberoptic laryngoscope. Students benefit from an anatomically correct nasal cavity including important landmarks such as the turbinates and visually accurate internal anatomy down to the fourth generation bronchi. Explore all bronchoscopy simulators or contact us for a free virtual demonstration. The AirSim Bronchi airway trainer is compatible with a full range of supraglottic devices. We recommend the following equipment sizes for optimal performance:

- 7.0-7.5 mm ID for nasal intubation
- 8.0-9.0 mm ID for oral intubation
- Size 3-5 for LMA laryngeal masks
- Size 35F-37F for endo-bronchial tubes
- Similar respective sizes for other supraglottic devices

Its realistic anatomy and durability make the AirSim Bronchi an excellent airway demonstration model for device manufacturers and educators. In addition to our airway trainers, we also offer a nerve block trainer and vital sign simulator ideal for students and healthcare professionals.

DURABLE AIRWAY TRAINER FOR TEACHING

The TruCorp AirSim multi-capable training head withstands continuous and repeated use in

medical procedure training, making it ideal for a classroom setting.

Package Contents

- 1 Carrier case
- 1 Bottle of TruCorp lubrication
- 3 Adult lung bags replicating 2 lungs and stomach
- 2 sets of adhesive pads (attachable to suction cups for increased stability if required)

Parts & Accessories

- Base plinth
- Neck locks
- Suction cup (Set of 8)
