Supplied with 10 training masks, Code Blue Life Monitoring System, neck brace and carrying bag.

Why Choose the Code Blue® I Multipurpose CPR and Patient Care Simulator for Your Simulation Lab in India?

The Code Blue® I Multipurpose CPR and Patient Care Simulator (Item No. 1017533, MPN: S303.M) by Gaumard is one of the most versatile full-body patient care manikins available for simulation labs in India. Weighing 28 kg and measuring 110 × 56 × 36 cm, this full-body adult simulator bridges the gap between basic CPR manikins and high-fidelity patient simulators — making it ideal for institutions that need a single platform covering resuscitation, airway management, nursing care, and patient assessment skills. The body is fully articulated with moveable neck, arms, and legs, and features soft, realistic skin on the face and genital areas for a lifelike training experience. The anatomically accurate, intubatable airway supports oral intubation practice and safe, sanitary CPR with a one-piece airway design. The manikin detaches at the waist for ease of storage and transport.

What sets this simulator apart from standard CPR manikins is the exceptional range of patient care features built into a single unit. Interchangeable external genital organs support both male and female catheterisation training. Interchangeable male and female breasts are included, with the left female breast containing a palpable malignancy for breast examination training. The eyes open and close, with one eye permanently dilated for neurological assessment practice. Multiple body openings include oral, nasal, optic, and gastrostomy ports. Stoma training is supported with a transverse colostomy stoma, ileostomy stoma, and suprapubic stoma. A demonstration set of two decubitus ulcers — one at initial stage and one at deeply infected stage — supports wound care and pressure sore management training. The simulator is supplied with 10 training masks, the Code Blue Life Monitoring System, a neck brace, and a carrying bag. It meets all OBRA requirements.

This simulator is ideal for nursing colleges, medical colleges with integrated clinical skills labs, paramedic training institutes, and hospitals running in-service nursing education programmes across India. It delivers genuine value for institutions seeking a comprehensive patient care and resuscitation trainer in a single, durable product.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized Gaumard distributor in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation workshops, and dedicated after-

sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Is the Code Blue® I Simulator compliant with NMC simulation lab requirements for Indian medical and nursing colleges? A: Yes. This simulator supports CPR, airway management, catheterisation, wound care, and patient assessment competencies aligned with NMC's CBME framework for both medical and nursing institutions.

Q: Does SEM Trainers provide installation and training support? A: Yes. We provide on-site installation, hands-on demonstration sessions, and faculty orientation workshops for every product delivered, anywhere in India.

Q: What is the warranty and how do I get support? A: All products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
