SKU:

Categories:ALS Adult

Product Description

The Complete CRiSis™ Torso Manikin is a complete resuscitation system consisting of modular components that allow you to create a manikin to suit your changing needs. The components may be purchased as a complete package or separately to update your existing manikin. Features:

- Airway Management
 - Anatomically correct nostrils, teeth, tongue, oral and nasal pharynx, larynx, cricoid ring, epiglottis, arytenoid, false and true vocal cords, trachea, and esophagus.
 - Practice oral, digital, and nasal intubation.
 - Intubate with E.T., E.O.A., P.T.L., Combitube®, and King System.
 - Practice suction and proper cuff inflation.

- Visible chest rise or stomach inflation.
- CPR
 - Adult compression depth
 - Visible chest rise
 - Mouth to Mouth or BVM compatible
- Defibrillation Chest Skin
- Interactive ECG capabilities

Why Choose the Life/form® CRiSis™ Torso for Your Simulation Lab in India?

The Life/form® CRiSis™ Torso (Item No. LF03957U) by Nasco Healthcare, USA is the compact, modular entry point into the CRiSis™ resuscitation training platform — a torso-format ALS trainer weighing 9.8 kg and measuring 78 x 44 x 31 cm. It delivers the core CRiSis™ airway management, CPR, and defibrillation capabilities in a highly portable form factor, making it the right choice for simulation labs, emergency medicine departments, and ALS training programmes in India that need a capable, space-efficient resuscitation trainer without the footprint or cost of a full-body system. Its modular design means additional components — IV arm, blood pressure arm, auscultation kit — can be purchased separately and added as the lab's training requirements grow.

The airway management module is anatomically accurate in exceptional detail: nostrils, teeth, tongue, oral and nasal pharynx, larynx, cricoid ring, epiglottis, arytenoid cartilages, false and true vocal cords, trachea, and oesophagus are all represented. Trainees can practice oral, digital, and nasal intubation, insert ET tubes, EOA, PTL, Combitube®, King Systems, and supraglottic airway devices, and practice suction and cuff inflation technique. Visible chest rise confirms correct tube placement; stomach inflation signals oesophageal intubation — immediate, objective feedback without electronics. The CPR module provides adult compression depth, visible chest rise, and compatibility with mouth-to-mouth and BVM ventilation. The defibrillation chest skin is compatible with all standard defibrillator brands, and interactive ECG capability is built in for rhythm recognition and defibrillation training. The CRiSis™ Auscultation Kit (LF03967U) is available as an optional upgrade for heart and lung sound training.

This torso is ideal for airway management skill stations, ACLS and ALS training programmes, emergency medicine residency departments, paramedic training institutes, and NMC-mandated clinical skills labs across India that need a compact, expandable ALS trainer.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Is this torso compliant with NMC simulation lab and AHA/ERC ACLS training requirements?

A: Yes. The CRiSis™ Torso supports the airway management, CPR, and defibrillation competencies required under NMC's CBME framework and AHA/ERC ACLS course guidelines.

Q: Can this torso be upgraded with additional modules later? A: Yes. The CRiSis™ platform is modular — the IV arm, blood pressure arm, and CRiSis™ Auscultation Kit (LF03967U) can all be added separately to expand training capability without replacing the base torso.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Manikin can be used with Supraglottic airway devices for airway training.
