Deluxe Plus CRiSis™ Manikin with CPR Metrix and iPad®

Item No. 1022168
Weight 28.078kg
MPN: LF03989[LF03956U]
Previous Item No. 1005649

Categories:ALS Adult

Product Description

Life/form® Adult CRiSis™ Manikins Complete resuscitation system that presents challenges you may face in real world situations, with five major features allowing practice of several simulation scenarios. It is ideal for Advanced Life Support (ALS) courses aimed to teach resuscitation guidelines and skills to healthcare professionals. Modular components allow you to create a manikin to suit your needs. **Airway Management**

- Compatible airway management devices include E.T., E.O.A., E.T.L., L.M.A., E.G.T.A., Combitube®, and King Systems
- Cricoid cartilage allows for practice of Sellick maneuver
- Oral, nasal, and digital intubation
- Palpable carotid pulse (manual)

- Separate left and right lungs for auscultation
- Suctioning capabilities

Defibrillation Chest

- Compatible with all standard brands and types of defibrillators, monitors, and patient simulators
- Internal load box absorbs full strength of every shock — designed to handle up to maximum recommended 360 Joules
- Manual, semiautomatic, and automatic defibrillation
- Monitor manikin like a real patient at 4 ECG sites and 2 defibrillation sites CPR
- Fully articulated head, neck, and jaw
- Jaw thrust
- Palpable and visual landmarks

Blood Pressure Arm

- Auscultatory gap
- 5 Korotkoff phases
- Systolic and diastolic levels, heart rate, and sound volume
- Radial pulse
- Use with an optional external speaker system to broadcast sounds to the entire classroom

IV Arm

- Articulated at the biceps for antecubital and dorsal access
- Bony landmark at shoulder to identify muscle tissue for intramuscular injections
- Realistic flashback from a pressurized system
- Replaceable skin and veins

Why Choose the Life/form® Deluxe Plus CRiSis™ Manikin with CPR Metrix and iPad® for Your Simulation Lab in India?

The Life/form® Deluxe Plus CRiSis™ Manikin with CPR Metrix and iPad® (Item No. 1022168, MPN: LF03989/LF03956U) by Nasco Healthcare, USA is the full-body Deluxe Plus configuration with CPR Metrix digital feedback, Interactive ECG Simulator, and carry case included as standard — but without the Advanced Airway laryngospasm and tongue oedema upgrade. Weighing 28.078 kg, this is the right choice for ACLS training programmes that need data-driven CPR performance assessment, ECG-integrated rhythm and defibrillation training, and the complete five-module ALS skill set, but whose curriculum does not require difficult airway simulation. It costs less than 1022169 while delivering the same CPR Metrix and iPad® debriefing capability.

All five ALS training modules are present. The airway management module supports ET, EOA, ETL, LMA, EGTA, Combitube®, and King Systems insertion, oral, nasal, and digital intubation, palpable cricoid cartilage for Sellick manoeuvre, manual carotid pulse, suction technique, and bilateral lung auscultation. The defibrillation chest accepts all standard defibrillator brands with an internal load box rated to 360 joules, monitors ECG at four sites and defibrillation at two sites, and supports manual, semiautomatic, and automatic defibrillation modes. The Interactive ECG Simulator provides programmed rhythm scenarios for integrated rhythm recognition and defibrillation decision training. The blood pressure arm delivers all five Korotkoff phases with auscultatory gap, adjustable systolic, diastolic, heart rate, and sound volume, radial pulse palpation, and optional external speaker connectivity. The IV arm articulates at the biceps for antecubital and dorsal access, includes an IM injection landmark, delivers realistic pressurised flashback, and features replaceable skin and veins. The CPR Metrix and iPad® system monitors compression depth, rate, ventilation rate and volume, no-flow time, and cycle count — generating eCPR™ performance reports for structured debriefing via student app (Android™ or Apple®) and instructor app (iPad® or Android™ tablet). A carry case is included as standard. The CRiSis™ Auscultation Kit (1019786) is available as an optional upgrade.

This manikin is ideal for ACLS and ALS training centres, emergency medicine residency programmes, hospital in-service training departments, and NMC-mandated simulation labs in Indian medical colleges that need digital CPR feedback and full ALS capability without difficult airway simulation.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, CPR Metrix and iPad® setup, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What is the difference between this (1022168) and the Deluxe Plus CRiSis™ with Advanced Airway Management (1022169)? A: This configuration (1022168) has standard airway management — no laryngospasm or tongue oedema simulation. Item 1022169 adds that difficult airway capability. All other features — CPR Metrix, iPad®, ECG Simulator, carry case — are identical between the two.

Q: Is a tablet or iPad® device included? A: No. The CPR Metrix app runs on Android™ or Apple® tablets and phones but the device itself must be sourced separately.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
