Deluxe CRiSis™ Torso with Advanced Airway Management

Item No. LF03983U
Weight 11.3kg
Make: Nasco Healthcare, USA

SKU:

Categories:ALS Adult

Product Description

Life/form® Adult CRiSis™ Manikins Complete resuscitation system that presents challenges you may face in real world situations, with five major features allowing practice of several simulation scenarios. It is ideal for Advanced Life Support (ALS) courses aimed to teach resuscitation guidelines and skills to healthcare professionals. Modular components allow you to create a manikin to suit your needs. **Airway Management**

- Compatible airway management devices include E.T., E.O.A., E.T.L., L.M.A., E.G.T.A., Combitube®, and King Systems
- Cricoid cartilage allows for practice of Sellick maneuver
- Oral, nasal, and digital intubation
- Palpable carotid pulse (manual)
- Separate left and right lungs for auscultation

- Suctioning capabilities

Defibrillation Chest

- Compatible with all standard brands and types of defibrillators, monitors, and patient simulators
- Internal load box absorbs full strength of every shock — designed to handle up to maximum recommended 360 Joules
- Manual, semiautomatic, and automatic defibrillation
- Monitor manikin like a real patient at 4 ECG sites and 2 defibrillation sites CPR
- Fully articulated head, neck, and jaw
- Jaw thrust
- Palpable and visual landmarks

Blood Pressure Arm

- Auscultatory gap
- 5 Korotkoff phases
- Systolic and diastolic levels, heart rate, and sound volume
- Radial pulse
- Use with an optional external speaker system to broadcast sounds to the entire classroom

IV Arm

- Articulated at the biceps for antecubital and dorsal access
- Bony landmark at shoulder to identify muscle tissue for intramuscular injections
- Realistic flashback from a pressurized system
- Replaceable skin and veins

Why Choose the Life/form® Deluxe CRiSis™ Torso with Advanced Airway Management for Your Simulation Lab in India?

The Life/form® Deluxe CRiSis™ Torso with Advanced Airway Management (Item No. LF03983U) by Nasco Healthcare, USA is the most capable torso configuration in the CRiSis™ range — combining Advanced Airway Management with laryngospasm and tongue oedema simulation, the Interactive ECG Simulator (included), and the full defibrillation chest in a compact 11.3 kg torso. From the comparison table across the CRiSis™ family, this torso is unique in its combination: it includes Advanced Airway with difficult airway conditions and the ECG Simulator, but without the blood pressure arm or IV arm — making it the right choice for programmes whose primary training priority is advanced airway and resuscitation skills in a highly portable format, without the additional weight and cost of the full five-module system.

The Advanced Airway module supports ET, EOA, ETL, LMA, EGTA, Combitube®, King Systems, and

supraglottic airway devices, oral, nasal, and digital intubation, Sellick manoeuvre via palpable cricoid cartilage, manual carotid pulse, suction technique, and bilateral lung auscultation. The laryngospasm and tongue oedema capability introduces simulated difficult airway conditions — a step up from the standard Deluxe CRiSis™ Torso — enabling instructors to present obstructed airway scenarios that require trainees to adapt their device selection and insertion technique in real time. The Interactive ECG Simulator provides programmed rhythm scenarios for integrated rhythm recognition and defibrillation decision training. The defibrillation chest accepts all standard defibrillator brands rated to 360 joules, supports ECG monitoring at four sites and defibrillation at two sites, and enables manual, semiautomatic, and automatic defibrillation practice. The CRiSis™ Auscultation Kit (LF03967U) is available as an optional upgrade; a hard carry case (LF03467U) is also available separately.

This torso is ideal for anaesthesiology and emergency medicine airway skills programmes, ACLS difficult airway training stations, outreach instructor programmes requiring portable advanced airway capability, and NMC-mandated simulation labs in Indian medical colleges that prioritise difficult airway and ECG-integrated resuscitation training.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: How does this differ from the Deluxe CRiSis™ Torso (LF03958U)? A: The Deluxe CRiSis™ Torso (LF03958U) has standard airway management — no laryngospasm or tongue oedema. This torso (LF03983U) adds Advanced Airway with difficult airway simulation. Both include the Interactive ECG Simulator. Neither includes blood pressure arm or IV arm.

Q: Can a blood pressure arm or IV arm be added later? A: This torso configuration does not include those modules. For full five-module ALS capability in a torso, consider the Complete Adult CRiSis™ or Deluxe CRiSis™ full-body configurations.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Manikin can be used with Supraglottic airway devices for airway training.
