SKU:

Categories:ALS Adult

Product Description

Life/form® Adult CRiSis™ Manikins Complete resuscitation system that presents challenges you may face in real world situations, with five major features allowing practice of several simulation scenarios. It is ideal for Advanced Life Support (ALS) courses aimed to teach resuscitation guidelines and skills to healthcare professionals. Modular components allow you to create a manikin to suit your needs. **Airway Management**

- Compatible airway management devices include E.T., E.O.A., E.T.L., L.M.A., E.G.T.A., Combitube®, and King Systems
- Cricoid cartilage allows for practice of Sellick maneuver
- Oral, nasal, and digital intubation
- Palpable carotid pulse (manual)
- Separate left and right lungs for auscultation

- Suctioning capabilities

Defibrillation Chest

- Compatible with all standard brands and types of defibrillators, monitors, and patient simulators
- Internal load box absorbs full strength of every shock — designed to handle up to maximum recommended 360 Joules
- Manual, semiautomatic, and automatic defibrillation
- Monitor manikin like a real patient at 4 ECG sites and 2 defibrillation sites CPR
- Fully articulated head, neck, and jaw
- Jaw thrust
- Palpable and visual landmarks

Blood Pressure Arm

- Auscultatory gap
- 5 Korotkoff phases
- Systolic and diastolic levels, heart rate, and sound volume
- Radial pulse
- Use with an optional external speaker system to broadcast sounds to the entire classroom

IV Arm

- Articulated at the biceps for antecubital and dorsal access
- Bony landmark at shoulder to identify muscle tissue for intramuscular injections
- Realistic flashback from a pressurized system
- Replaceable skin and veins

Why Choose the Complete CRiSis™ Resuscitation Training System with Advanced Airway Management – Full-Body for Your Simulation Lab in India?

The Complete CRiSis™ Resuscitation Training System with Advanced Airway Management – Full-Body (Item No. 1021987, MPN: LF03952U) by Nasco Healthcare, USA is the full-body configuration of the CRiSis™ platform with one critical addition over the standard Complete Adult CRiSis™: Advanced Airway Management with laryngospasm and tongue oedema simulation. Weighing 28.078 kg, this full-body manikin is purpose-built for ALS courses that need to go beyond routine intubation and train healthcare professionals to manage genuinely difficult, obstructed airway scenarios — the kind encountered in real emergency situations. It is ideal for ACLS training programmes, emergency medicine residency departments, anaesthesiology skills labs, and NMC-mandated simulation labs in Indian medical colleges that need the most comprehensive airway and resuscitation training platform in the CRiSis™ range.

The five integrated training modules cover the complete ALS skill set. The Advanced Airway Management module supports ET, EOA, ETL, LMA, EGTA, Combitube®, and King Systems insertion, oral, nasal, and digital intubation, palpable cricoid cartilage for Sellick manoeuvre, manual carotid pulse, suction techniques, and separate left and right lungs for bilateral auscultation. The Advanced Airway upgrade adds laryngospasm and tongue oedema conditions — creating the difficult airway scenarios that separate this configuration from the standard Complete Adult CRiSis™. The manikin is also compatible with supraglottic airway devices. The defibrillation chest accepts all standard defibrillator brands with an internal load box rated to 360 joules, monitors ECG at four sites and defibrillation at two sites, and supports manual, semiautomatic, and automatic defibrillation modes. The blood pressure arm delivers all five Korotkoff phases with auscultatory gap, adjustable systolic, diastolic, heart rate, and sound volume, radial pulse palpation, and optional external speaker connectivity for classroom-wide broadcast. The IV arm articulates at the biceps for antecubital and dorsal access, includes an intramuscular injection landmark, delivers realistic pressurised flashback, and features replaceable skin and veins. The full-body format adds spatial realism for team-based resuscitation training and patient positioning practice. Optional upgrades include the CRiSis™ Auscultation Kit (1019786) and a carry case (1021990).

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation workshops, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What distinguishes this model from the Complete Adult CRiSis™ (1019919)? A: This configuration (1021987) adds Advanced Airway Management with laryngospasm and tongue oedema simulation to the standard Complete Adult CRiSis™ feature set. It is the correct choice for programmes that need to train difficult airway management in addition to routine ALS skills.

Q: Is this manikin compliant with NMC simulation lab and AHA/ERC ACLS training requirements? A: Yes. The full ALS skill suite — advanced airway, CPR, defibrillation, IV access, and blood pressure — supports both NMC's CBME competency framework and AHA/ERC ACLS course requirements.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Manikin can be used with Supraglottic airway devices for airway training.
