SKU:

Categories:ALS Child

Product Description

Package of 10.

Why Choose the Life/form® 10 Intraosseous Leg Bones for Your Simulation Lab in India?

The Life/form® 10 Intraosseous Leg Bones (Item No. LF03618U) by Nasco Healthcare, USA is a 10-pack of genuine OEM replacement intraosseous tibial bone inserts weighing 0.66 kg per pack, designed for use with compatible Life/form® paediatric ALS simulators that include intraosseous access training capability. The IO tibial insertion site is the highest-wear procedural component of any paediatric ALS simulator — each IO needle or drill insertion penetrates the simulated cortical bone, and over repeated training sessions the cumulative damage degrades the resistance profile, landmark feel, and structural integrity of the bone insert until it no longer accurately represents the force required for

correct IO needle placement in a real paediatric patient.

Intraosseous access is a critical emergency vascular skill in paediatric resuscitation — it is the first-line vascular access route when IV access fails in a child in cardiac arrest, severe shock, or status epilepticus, and the speed and accuracy of IO placement is directly dependent on trained technique. Trainees who practise on a worn bone insert are calibrating against incorrect cortical resistance — developing force application and angle habits that will not transfer accurately to real patients. Replacing the IO bone inserts regularly with genuine OEM LF03618U inserts restores the correct cortical hardness, correct landmark geometry, and correct needle resistance that paediatric IO training requires. The 10-pack format provides a practical stock quantity for simulation labs running regular paediatric ALS, PALS, and emergency medicine training programmes. Only genuine OEM inserts are guaranteed to fit the compatible Life/form® simulator IO module with correct dimensions and material specification.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM consumables to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which Life/form® simulators are these IO leg bones compatible with? A: LF03618U is designed for compatible Life/form® paediatric ALS simulators with intraosseous tibial access modules by Nasco Healthcare. Contact us to confirm compatibility with your specific simulator before ordering: sem@semtrainers.com or +91-88495 63724.

Q: How many IO leg bones are included per order? A: Each order contains 10 replacement intraosseous leg bones.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare consumables with pan-India delivery.
