SKU:

Categories:ALS Newborn

Product Description

SUSIE and SIMON Newborn is a life support training simulator that features a fully articulating head and jaw with tongue, and SAFE CPR™ individual disposable airways. Its airway is blocked when the head is forward, and

the chest cavity with moulded ribcage, lungs and heart is easily accessible.

A realistic chest rise and arterial pulse points make the training even more more effective. Comes with instruction manual and carrying bag.

Features

- Ten totally disposable airways to practice hygienic mouth-to-mouth ventilation. Realistic chest rise during ventilations.
- Realistic chest cavity provides anatomic landmark as well as chest compliance. Practice compressions and airway ventilation.
- Bilateral brachial, right femoral, and left posterior tibial pulses.
- Multiple arterial pulse sites.
- Fully articulating head and jaw with tongue
- SAFE CPR™ individual disposable airways to practice hygienic mouth-to-mouth ventilation
- Airway blocked when head is forward
- Easily accessible chest cavity with molded ribcage, lungs, and heart
- Realistic chest rise during ventilation
- Arterial pulse points
- Soft, lifelike faceskin with molded hair
- Instruction manual
- Custom nylon carrying bag
- T-shirt and shorts

Why Choose the Gaumard Susie® and Simon® Newborn CPR and Trauma Care Simulator for Your Simulation Lab in India?

The Gaumard Susie® and Simon® Newborn CPR and Trauma Care Simulator (Item No. 1018866, MPN: S101.M) is the entry-level configuration in the four-tier Susie® and Simon® newborn family, weighing 3 kg — the lightest and most portable configuration in the range. It delivers the core newborn CPR and airway management training capability that all four configurations share: fully articulating head and jaw with tongue, SAFE CPR™ individual disposable airways, realistic chest rise during ventilation, accessible chest cavity with moulded ribcage, lungs, and heart, and multiple arterial pulse points including bilateral brachial, right femoral, and left posterior tibial sites. For NRP foundation training, basic newborn BLS, and paediatric nursing programmes in India that need a realistic newborn patient for CPR technique and airway management training without electronic monitoring or vascular access modules, this is the correct entry point.

The airway management module enforces correct technique from the first session — the airway blocks when the head is forward, requiring trainees to apply correct head-tilt/chin-lift positioning as a prerequisite before ventilation succeeds. Ten individually disposable airways maintain hygienic mouth-to-mouth ventilation practice across multiple trainees. The chest cavity with moulded ribcage, lungs, and heart provides correct anatomical landmarks for compression placement and delivers realistic

chest compliance during CPR technique development. Realistic chest rise confirms effective ventilations. Multiple arterial pulse sites support integrated assessment training within the newborn resuscitation sequence. The soft lifelike faceskin with moulded hair, t-shirt and shorts, and custom nylon carrying bag complete the package. The three upgraded configurations in the family — with Code Blue® Monitor (1017560), with Intraosseous and Venous Access (1017561), and with Code Blue® Monitor plus IO and Venous Access (1014570) — add OMNI® electronic feedback and/or vascular access capabilities to this same foundation. For simulation labs that need those capabilities from the outset, the apex configuration (1014570) is the recommended choice.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Gaumard Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Does this simulator include electronic CPR performance monitoring? A: No. The Omni™ Code Blue® electronic monitoring pack is absent from this base configuration. It is available in the Code Blue® Monitor (1017560) and Code Blue® Monitor plus IO and Venous Access (1014570) configurations.

Q: Does this simulator include intraosseous or venous access training? A: No. IO access and femoral venous sites are available from the Newborn CPR and Trauma Care Simulator with Intraosseous and Venous Access (1017561) upward.

Q: What is the warranty and how do I get support? A: All Gaumard products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
