SKU:

Categories:ALS Newborn

Product Description

NENAsim series is an extremely realistic neonatal human patient simulator, with set ups for different training purposes such as Basic Patient Care, Basic Life Support, Advanced Life Support as well as advanced medical scenario and treatment training.

The NENAsim Infant ALS, Girl (Item No. 1022691 | Previous Item No. 1021102 | MPN: MXNENAINALS2) is an updated version of the highly acclaimed NENAsim neonatal ALS training simulator. Part of the NENAsim series, this simulator is designed for comprehensive infant Advanced Life Support and neonatal patient care training. It features life-like silicone skin, realistic anatomy, and flexible limbs as standard, providing one of the most authentic infant training experiences available. Weighing 2.1 kg and measuring 50 x 45 x 23 cm, it is lightweight and easy to handle in simulation labs

and training environments.

This model supports patient care procedures, realistic airway management, intubation, oxygen delivery, and key CPR techniques including head tilt, chin lift, and jaw thrust. It is ideal for medical colleges, nursing institutes, neonatal ICUs, pediatric departments, and healthcare simulation centers looking for a reliable, hands-on infant ALS training manikin.

Q1. What is the NENAsim Infant ALS, Girl (1022691) used for? It is used for neonatal Advanced Life Support (ALS) training, covering infant patient care, realistic airway management, intubation, oxygen delivery, and CPR airway techniques such as head tilt, chin lift, and jaw thrust.

Q2. What is the difference between Item No. 1022691 and the previous Item No. 1021102? Item No. 1022691 is the updated version of the earlier 1021102 model. Both share the same MPN (MXNENAINALS2) and core features, with 1022691 being the current active listing.

Q3. What are the standard features of all NENAsim simulators? All NENAsim simulators feature realistic anatomy, life-like silicone skin, and flexible limbs, making them among the most true-to-life neonatal training manikins available.

Q4. Does this model include CPR feedback software? No, this model does not include software. For CPR feedback and blood circulation vital signs monitoring, the NENAsim Infant ALS with Basic Software (1021105) is the recommended upgrade.

Q5. What training procedures are supported? Trainees can practice patient care procedures, realistic airway management, intubation, oxygen delivery, and CPR maneuvers including head tilt, chin lift, and jaw thrust.

Q6. Is a boy version available? Yes, the boy version is available under Item No. 1021103. The full NENAsim series includes Infant Care, Infant ALS, ALS with Basic Software, ALS+ with Basic Software, and Human Patient Simulator (HPS) in both boy and girl variants.

Q7. What are the dimensions and weight? The simulator measures 50 x 45 x 23 cm and weighs 2.1 kg, making it compact and easy to use in simulation labs.

Q8. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.

Realistic anatomy, life-like silicone skin and flexible limbs are standard features of NENAsim.
