SKU:

Categories:ALS Newborn

Product Description

NENAsim series is an extremely realistic neonatal human patient simulator, with set ups for different training purposes such as Basic Patient Care, Basic Life Support, Advanced Life Support as well as advanced medical scenario and treatment training.

The NENAsim Infant ALS, Girl (Item No. 1021102 | MPN: MXNENAINALS2_old) is the earlier version of the highly regarded NENAsim neonatal ALS training simulator. Part of the NENAsim series, this simulator is built for infant Advanced Life Support and neonatal patient care training, featuring life-like silicone skin, realistic anatomy, and flexible limbs as standard. Weighing 2.1 kg and measuring 50 x 45 x 23 cm, it is a compact and practical training tool for simulation labs and healthcare training environments.

This model supports patient care procedures, realistic airway management, intubation, oxygen delivery, and key CPR techniques including head tilt, chin lift, and jaw thrust. It is well suited for medical colleges, nursing institutes, neonatal ICUs, pediatric departments, and healthcare simulation centers. Please note that this is the older item number version; the current updated model is listed under Item No. 1022691.

Q1. What is the NENAsim Infant ALS, Girl (1021102) used for? It is used for neonatal Advanced Life Support (ALS) training, covering infant patient care, realistic airway management, intubation, oxygen delivery, and CPR techniques such as head tilt, chin lift, and jaw thrust.

Q2. Is this the current version of the product? No, Item No. 1021102 is the older version of this simulator. The updated current model is listed under Item No. 1022691. Both share the same MPN (MXNENAINALS2) and core features.

Q3. What are the key features of all NENAsim simulators? All NENAsim simulators come with realistic anatomy, life-like silicone skin, and flexible limbs as standard, providing one of the most authentic neonatal training experiences available.

Q4. Does this model include CPR feedback software? No, this model does not include software. For CPR performance feedback and blood circulation vital signs, the NENAsim Infant ALS with Basic Software (1021105) is the recommended upgrade.

Q5. What training procedures can be practiced? Trainees can practice patient care, realistic airway management, intubation, oxygen delivery, and CPR airway maneuvers including head tilt, chin lift, and jaw thrust.

Q6. Is a boy version available? Yes, the boy version is available under Item No. 1021103. The

NENAsim series is available in multiple configurations — Infant Care, Infant ALS, ALS with Basic Software, ALS+ with Basic Software, and Human Patient Simulator (HPS).

Q7. What are the dimensions and weight? The simulator measures 50 x 45 x 23 cm and weighs 2.1 kg, making it lightweight and easy to handle during training sessions.

Q8. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.

Realistic anatomy, life-like silicone skin and flexible limbs are standard features of NENAsim.
