Categories:ALS Newborn

Product Description

STAT Baby Advanced has all the features of a STAT Baby, but utilizes easy-to-use iPad®* technology. It gives the instructor control of the physiological features of the baby to deliver challenging training to develop student assessment skills and easily tracks sessions for later review and debriefing. Key functions include managing student information, easily create alternate scenarios or use those already existing, and efficient records management of the training, all managed through an easy iPad®* interface. It satisfies every training need for post-neonatal care of pediatric patients, from introducing students to basic concepts to challenging medical staff in advance medical procedures. This affordable trainer augments your training budget by utilizing low-cost replacement items in those areas where repetitive, perfect practice, makes perfect skill attainment. **Includes the following standard features of the STAT Baby:**

- 7 pulse points
- I/O leg
- 3 IV sites
- PICC access site
- IM/SQ injection sites
- Advanced intubation head with tongue edema and laryngospasm
- Pneumothorax reduction bilaterally
- 4-lead monitoring
- Chest tube insertion(left side only)
- Defibrillation
- Rectal medication
- Urinary catheterization
- Very lifelike new skin material
- Replacement parts
- Accepts LMA, ET, OPA, NPA, and LT airways

Also includes these additional features:

- Sternal retraction
- Fully enclosed crib with waterproof surface
- 6 ft. (183 cm) tether assembly so that the baby can be handled
- Aneroid blood pressure cuff
- Heart sounds
- Lung sounds
- Voice sounds
- Spontaneous breathing

The STAT Baby Advanced comes with its own iPad®*. *iPad® is a trademark of Apple, Inc., registered in the U.S. and other countries.

Why Choose the STAT Baby Advanced for Your Simulation Lab in India?

The STAT Baby Advanced (Item No. 101-8010U) by Nasco Healthcare, USA is the iPad®-enabled upper tier of the STAT Baby neonatal simulation platform, designed for advanced post-neonatal care training of paediatric patients. It includes every capability of the STAT Baby Basic — 7 pulse points, IO leg, 3 IV sites, PICC access site, IM/SQ injection sites, advanced intubation head with tongue oedema and laryngospasm, bilateral pneumothorax reduction, 4-lead monitoring, chest tube insertion (left side only), defibrillation, rectal medication administration, urinary catheterisation, and compatibility with LMA, ET, OPA, NPA, and LT airways — and adds four significant capabilities that transform it from a procedural skill trainer into an instructor-controlled scenario platform: spontaneous breathing, heart

sounds, lung sounds, and voice sounds, all managed through the included iPad®.

The iPad® interface gives the instructor real-time physiological control of the simulator — adjusting spontaneous breathing rate, managing heart and lung sound presentation, and controlling voice output — while simultaneously managing student session records, tracking training progress, and enabling scenario creation or selection from existing scenario libraries. This makes the STAT Baby Advanced the correct choice for simulation labs in India that run structured scenario-based paediatric training programmes where the instructor needs to dynamically vary the patient's clinical presentation in response to trainee actions, rather than a static procedural trainer. The manikin is housed in a fully enclosed crib with a waterproof surface and a 6 ft. tether assembly that allows the baby to be handled and moved during simulation without disconnecting from the monitoring system. An aneroid blood pressure cuff, sternal retraction capability, and very lifelike new skin material complete the platform. Low-cost replacement consumables keep ongoing operating costs manageable, and the system is upgradeable as training requirements evolve.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, iPad® setup and faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What does the STAT Baby Advanced add over the STAT Baby Basic? A: Four capabilities: spontaneous breathing, heart sounds, lung sounds, and voice sounds — all instructor-controlled through the included iPad® interface. It also adds sternal retraction, a fully enclosed waterproof crib, a 6 ft. tether assembly, aneroid blood pressure cuff, and session management/debriefing capability through the iPad®. The STAT Baby Basic has none of these features.

Q: Is the iPad® included or optional? A: The iPad® is included as standard with the STAT Baby Advanced. iPad® is a trademark of Apple, Inc., registered in the U.S. and other countries.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
