Product Description

The newly developed [3B ORTHObones](#) are the highest quality artificial bones on the market. These realistic bones are constructed to simulate the two distinct layers of real human bones; the hard outer cortical shell and the softer inner cancellous bone. The excellent biomechanical characteristics make these bones an exceptional value! The humerus bone is ideal for surgeons and orthopedists to practice

correcting [arm fractures](#) or for medical engineers to demonstrate new medical devices.

ORTHObones Premium — Left Humerus for India

The newly developed ORTHObones Premium bones are among the highest quality artificial bones on the market. These realistic bones are constructed to simulate the two distinct layers of real human bone: the hard outer cortical shell and the softer inner cancellous bone.

The humerus bone (Item No. 1016670 [W19130], MPN 0130L) is ideal for surgeons and orthopedists to practice correcting arm fractures, or for medical engineers to demonstrate new medical devices.

Specifications: Weight 0.115 kg. Dimensions 34 x 5 x 5 cm. MPN 0130L.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying orthopedic workshop and biomechanical training equipment to 1,500+ institutions across 28 Indian states, with pan-India delivery and dedicated after-sales support.

FAQ Q: What is this humerus bone model used for? **A:** Practicing correction of arm fractures and demonstrating new medical devices in a realistic bone structure.

Q: How do I order from SEM Trainers? **A:** Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
