Why Choose the 10 Tracheal Airways for Your Simulation Lab in India?

The 10 Tracheal Airways (Item No. 1005601 / W44025, MPN: LF03122U) by Nasco Healthcare, USA is a 0.19 kg pack of 10 genuine OEM replacement tracheal airways compatible with Life/form® manikins W44001, W44069, W44070, W44253, and W44255. The tracheal airway is the internal disposable component that enables intubation and ventilation training on compatible Life/form® manikins — it is the replaceable element that sustains correct airway feel and resistance during oral and nasal intubation technique practice, and must be replaced periodically to maintain the realistic feedback that intubation training depends on.

For simulation labs, nursing institutes, PALS and ALS training centres, and NMC-mandated skills labs in India running regular intubation and ventilation training sessions on compatible Life/form® manikins, maintaining a stock of genuine OEM LF03122U tracheal airways ensures sessions are never interrupted by a worn or deteriorated airway component. The 10-pack provides a working buffer across multiple training sessions before reordering. Only genuine OEM W44025 airways are guaranteed to fit the compatible manikin airway channels correctly and deliver the authentic intubation resistance feedback that validates correct laryngoscopy and tube placement technique. Third-party alternatives may not replicate the correct dimensions or material compliance of the OEM component, degrading training realism.
