SKU:

Categories:BLS Adult

Product Description

The comprehensive design allows for practice of Heimlich maneuver and abdominal thrusts, as well as CPR and mouth-to-mouth breathing. Realistic anatomical markings (Adam's apple, carotid arteries, navel, rib cage, chest notch) make it easy to learn correct hand placement for checking pulse, performing chest compressions, and more. Provides valuable student feedback and other important features: • Head tilt/chin lift required to open airway • Proper anatomical landmarks • Audible compression "clicker" to ensure proper technique Easy-to-clean heads are dishwasher safe and can easily be sanitized. Lung bags are replaceable. Designed to meet American Heart Association criteria for desirable manikin features. Packed in a rugged cardboard carrying case with a supply of 10 face-

shield lung bags and an insertion tool.

Why Choose the CPR Prompt® Adult/Child Manikin for Your Simulation Lab in India?

The CPR Prompt® Adult/Child Manikin (Item No. 1017939 / W44713, MPN: LF06001U) by Nasco Healthcare, USA is a 2.5 kg dual-purpose CPR and choking response trainer, designed to meet American Heart Association criteria for desirable manikin features. The comprehensive design allows practice of both the Heimlich manoeuvre and abdominal thrusts alongside standard CPR and mouth-to-mouth breathing — covering two critical emergency response skills on a single, compact manikin. For BLS certification centres, schools, nursing colleges, and community CPR outreach programmes in India that want choking response training integrated with standard CPR training rather than purchased as a separate product, CPR Prompt® delivers both in one cost-effective unit.

Realistic anatomical markings — Adam's apple, carotid arteries, navel, rib cage, and chest notch — make it easy for trainees to learn correct hand placement for pulse checks, chest compressions, and abdominal thrust positioning. The airway requires correct head tilt/chin lift to open, training that technique as a non-negotiable precondition for ventilation. An audible compression "clicker" provides immediate auditory confirmation of proper compression technique, giving trainees real-time feedback without requiring electronic equipment. Easy-to-clean heads are dishwasher safe and can be easily sanitised between training sessions, and lung bags are replaceable for hygienic multi-trainee use. Packed in a rugged cardboard carrying case with a supply of 10 face-shield lung bags and an insertion tool.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: Does this manikin support choking response training? A: Yes. The comprehensive design supports practice of the Heimlich manoeuvre and abdominal thrusts in addition to standard CPR and mouth-to-mouth breathing.

Q: How does the audible clicker work? A: The compression clicker provides immediate auditory confirmation when correct compression technique is applied, giving trainees real-time feedback without requiring electronic equipment.

Q: What is included? A: A rugged cardboard carrying case, 10 face-shield lung bags, and an insertion tool.
