Brad™ Compact CPR Training Manikin with Electronics

Item No. 1009004 [W44578]
Weight 6.156kg
MPN: 100-2850EXPORTU / PP02850EXU / SB32375U

SKU:

Categories:BLS Adult

Product Description

This economical CPR manikin is constructed of soft, realistic vinyl plastic over polyurethane foam for a “human” feel. Features include: • longer torso for realistic abdominal thrusts • realistic head tilt and chin lift for opening airway • can easily be manipulated to realistically simulate airway obstruction or choking situations • a user-friendly lung/airway design that eliminates cleaning. Includes three [mouth/nose](#) pieces and three [disposable lung/airway systems](#). Comes with an exterior console box that indicates proper hand position, adequate chest compressions, and adequate air volume Nylon carry bag and kneeling pads included.

Important cross-reference confirmed. Item No. 1009004 [W44578] — this is the **same W44578** referenced as compatible with the Breastplate for Resuscitation Torso with Electronics (1013247) done earlier this session. That breastplate is the structural/electronic replacement part for this exact manikin.

6.156 kg, MPN 100-2850EXPORTU / PP02850EXU / SB32375U, Nasco Healthcare, USA — Make field absent. Console box electronic feedback (hand position, compression adequacy, air volume) — same external console approach as W44538 (Adult CPR Torso with Electronics) done earlier, but compact format. Compatible consumables already identified this session: 10 Mouth/Nose Pieces (W44560) and 24 Adult Airway Systems (W44559).

Why Choose the Brad™ Compact CPR Training Manikin with Electronics for Your Simulation Lab in India?

The Brad™ Compact CPR Training Manikin with Electronics (Item No. 1009004 / W44578, MPN: 100-2850EXPORTU / PP02850EXU / SB32375U) by Nasco Healthcare, USA is a 6.156 kg economical CPR manikin constructed of soft, realistic vinyl plastic over polyurethane foam for a genuinely human feel, with an external console box providing electronic feedback on hand position, compression adequacy, and air volume. For BLS certification centres, hospital in-service programmes, and nursing institutes in India that need objective electronic feedback in a compact, portable format, the Brad™ Compact delivers instructor-visible real-time technique confirmation without the bulk of a full electronic patient simulator.

The longer torso enables realistic abdominal thrust training, and realistic head tilt/chin lift opens the airway correctly. The airway can be easily manipulated to realistically simulate airway obstruction or choking situations, extending the manikin's use beyond standard CPR into choking-response training. A user-friendly lung/airway design eliminates the cleaning burden that traditional reusable airway systems require — combined with the included three mouth/nose pieces and three disposable lung/airway systems, hygienic group training is straightforward. The exterior console box indicates proper hand position, adequate chest compressions, and adequate air volume — giving instructors a clear, immediate read on trainee technique during live practice. A nylon carry bag and kneeling pads are included for transport and comfortable trainee positioning.

For ongoing maintenance, this manikin (W44578) is compatible with the Breastplate for Resuscitation Torso with Electronics (1013247) for structural and electronic component replacement, the 10 Mouth/Nose Pieces (W44560), and the 24 Adult Airway Systems (W44559) for consumable restocking.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What does the console box feedback indicate? A: The exterior console box indicates proper

hand position, adequate chest compressions, and adequate air volume during CPR practice — giving instructors clear, real-time technique feedback.

Q: Can this manikin simulate choking emergencies? A: Yes. The airway can be easily manipulated to realistically simulate airway obstruction or choking situations, in addition to standard CPR training.

Q: What consumables and replacement parts does this manikin need? A: Compatible consumables include the 10 Mouth/Nose Pieces (W44560) and the 24 Adult Airway Systems (W44559). For structural and electronic component replacement, the Breastplate for Resuscitation Torso with Electronics (1013247) is the matching OEM part.
