CPR Torso

Item No. 1005753 [W44597]
Weight 5.358kg
Dimensions 65 x 38 x 22 cm
MPN: 100-2801U / PP02801U / SB24901U

SKU:

Categories:BLS Adult

Product Description

Made of soft, realistic vinyl plastic over polyurethane foam. Features include: • Long torso for realistic abdominal thrusts • Realistic head tilt and chin lift for opening airway • Anatomical landmarks such as sternum, ribcage and sub-sternal notch • Airway can be easily manipulated to simulate airway obstruction or choking situations Supplied with 3 disposable [lung/airway systems](#), 3 [mouth/nose pieces](#) and nylon carrying bag with kneeling pads

Why Choose the CPR Torso for Your Simulation Lab in India?

The CPR Torso (Item No. 1005753 / W44597, MPN: 100-2801U / PP02801U / SB24901U) by Nasco Healthcare, USA is a 5.358 kg, 65 x 38 x 22 cm adult CPR training torso made of soft, realistic vinyl plastic over polyurethane foam. For BLS certification centres, nursing colleges, and hospital in-service programmes in India that need a versatile adult CPR torso supporting both standard resuscitation training

and choking response scenarios, this torso (W44597) is the foundation platform for an established family of genuine OEM Nasco consumables and replacement parts — already supplied in this catalogue: the Breastplate for Resuscitation Torso (1013244), and the 24 Adult Airway Systems (W44559).

The long torso enables realistic abdominal thrust training, and realistic head tilt/chin lift opens the airway correctly for ventilation. Anatomical landmarks — sternum, ribcage, and sub-sternal notch — give trainees the correct surface reference points for hand placement and compression technique. The airway can be easily manipulated to simulate airway obstruction or choking situations, extending the torso's training use beyond standard CPR into choking-response scenarios on the same manikin. Supplied with 3 disposable lung/airway systems, 3 mouth/nose pieces, and a nylon carrying bag with kneeling pads.

For programmes that need light-signal electronic feedback on hand placement, ventilation volume, and compression, the OMNI® Code Blue-monitored CPR Simon® Torso (1022057) is the upgrade path for objective, data-logged CPR quality assessment on a torso platform.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Can this torso be used for choking response training? A: Yes. The airway can be easily manipulated to simulate airway obstruction or choking situations, in addition to standard CPR training.

Q: What is included? A: 3 disposable lung/airway systems, 3 mouth/nose pieces, and a nylon carrying bag with kneeling pads.

Q: What replacement parts and consumables are available for this torso? A: The Breastplate for Resuscitation Torso (1013244) for structural replacement, and the 24 Adult Airway Systems (W44559) for consumable restocking — both genuine OEM Nasco Healthcare parts for the W44597 manikin.
