CPR Torso

Item No. 1005725 [W44537]

Weight 7.872kg

Dimensions 70 x 43 x 22 cm

MPN: 100-2000EXPORTU / PP02000EXU / SB32425U

[Read More](#)

SKU:

Categories:BLS Adult

Product Description

This lightweight and easy to transport torso features: • Airway ball valve which allows the lungs to inflate only if the head is extended and accurately positioned • Lifelike anatomical landmarks such as carotid pulse, sternum, ribcage and sub-sternal notch • Easy to replace [mouth/nose pieces](#) • Soft carrying case with kneeling pads

Why Choose the CPR Torso for Your Simulation Lab in India?

The CPR Torso (Item No. 1005725 / W44537, MPN: 100-2000EXPORTU / PP02000EXU / SB32425U) by Nasco Healthcare, USA is a 7.872 kg, 70 × 43 × 22 cm lightweight, easy-to-transport adult CPR training torso — the export-configured base version of Nasco's adult CPR torso line, without electronic feedback. For BLS certification centres, nursing colleges, and community CPR outreach programmes

in India that need a reliable, portable CPR torso for instructor-led training without electronic feedback overhead, this is the economical entry point in the Nasco adult CPR torso range.

The airway ball valve mechanism only allows the lungs to inflate when the head is correctly extended and accurately positioned — training head tilt/chin lift technique as the non-negotiable precondition for effective ventilation, exactly as it must be performed on a real patient. Lifelike anatomical landmarks — carotid pulse, sternum, ribcage, and sub-sternal notch — give trainees the correct surface reference points for hand placement and pulse check technique. Easy-to-replace mouth/nose pieces (10 Mouth/Nose Pieces, W44560, available separately) maintain hygienic practice across multiple trainees. The torso ships in a soft carrying case with kneeling pads, making it straightforward to set up and transport between training venues — practical for outreach and multi-site training programmes across India.

For training programmes that want electronic light-feedback confirming hand placement, ventilation volume, and compression — without the higher cost of a full electronic patient simulator — the Adult CPR Torso with Electronics (1005726 / W44538) is the equivalent torso with that capability added.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Does this torso include electronic feedback? A: No. This is the base CPR Torso without electronic feedback. For light-signal feedback on hand placement, ventilation volume, and compression, see the Adult CPR Torso with Electronics (1005726 / W44538).

Q: Does the airway open without correct head positioning? A: No. The airway ball valve only allows lung inflation when the head is correctly extended and positioned, training correct airway opening technique as a precondition for ventilation.

Q: What compatible consumable should I order? A: The 10 Mouth/Nose Pieces (W44560) is the compatible replaceable consumable for this torso.
