Categories:BLS Adult

Product Description

This life-size torso allows practice of abdominal/chest thrust back blow procedures (Heimlich manoeuvre) and mouth sweep for clearing a blocked airway. When correct procedures are performed, the manikin will expel the object causing the obstruction. Made of durable vinyl to create a realistic feel. Features include: • Anatomical landmarks such as ribcage, xiphoid process and jugular notch Supplied with choking objects, shirt and soft carrying bag.
The Adult Choking Torso (Item No. 1005724 [W44536] | MPN: 100-1602U / PP01602U / SB10234U) is a life-size adult torso trainer designed for practicing airway obstruction relief techniques, including abdominal thrusts, chest thrusts, back blows (Heimlich manoeuvre), and mouth sweeps. Weighing 5.054 kg and measuring 79 x 46 x 25.5 cm, it is made from durable vinyl to provide a realistic feel

during training. When correct procedures are performed, the manikin will automatically expel the simulated choking object — providing instant confirmation that the trainee has applied the technique correctly.

The torso features clearly defined anatomical landmarks including the ribcage, xiphoid process, and jugular notch, ensuring trainees learn precise hand placement for effective choking relief. It comes supplied with choking objects, a shirt, and a soft carrying bag, making it a complete and ready-to-use training solution for first aid courses, BLS training programs, hospital staff training, and public safety education.

Q1. What is the Adult Choking Torso used for? It is used to practice airway obstruction relief techniques on an adult patient, including abdominal thrusts, chest thrusts, back blows (Heimlich manoeuvre), and mouth sweeps for clearing a blocked airway.

Q2. How does the torso confirm correct technique? When correct choking relief procedures are performed, the manikin automatically expels the simulated choking object — providing immediate tactile and visual confirmation that the technique was applied correctly.

Q3. What anatomical landmarks are included on this torso? The torso features clearly defined anatomical landmarks including the ribcage, xiphoid process, and jugular notch, helping trainees identify precise hand placement for effective abdominal and chest thrusts.

Q4. What material is the Adult Choking Torso made from? It is made from durable vinyl, providing a realistic feel that closely mimics the texture and resistance of a real human torso during choking relief training.

Q5. What is included in the package? The package includes the adult choking torso, choking objects for simulation, a shirt, and a soft carrying bag for easy transport and storage.

Q6. What are the dimensions and weight of this torso? The torso measures 79 x 46 x 25.5 cm and weighs 5.054 kg, making it life-size and realistically proportioned for adult choking training.

Q7. Who is this trainer ideal for? It is ideal for first aid training institutes, BLS certification centers, hospital staff training departments, emergency rescue teams, community safety programs, and any organization teaching airway obstruction relief techniques.

Q8. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
