Product Description

An inexpensive manikin designed for teaching individuals or large groups the life-saving techniques of CPR. The one-piece, disposable lung/mouth protection bags make this manikin completely sanitary. The airway opens using the head tilt/chin lift method and there is a visible chest rise when ventilated. The xiphoid process provides an anatomical reference point for hand placement and compressions.

Basic Buddy® CPR Manikin is a dramatic, inexpensive, and state-of-the-art manikin designed for teaching individuals or large groups the life-saving techniques of CPR. This manikin offers a realistic and affordable way to provide each student with their own CPR manikin. The one-piece, disposable lung/mouth protection system makes this manikin completely sanitary - there is no risk of cross contamination and no need to sanitize the manikins after use! The airway opens using the head tilt/chin lift method, and there is a visible chest rise when ventilated. The xiphoid process provides an anatomical reference point for hand placement and compressions. The manikin also features both adult and child capabilities. Basic Buddy® manikins are simple to assemble and provide trouble-free maintenance. Consists of 1 manikin, 10 lung/mouth protection bags, one insertion tool, and an instruction manual. **NOTE:** Only use AED pads designed for foam body manikins. **Features:** • Adult and Child Capabilities • No Messy Cleanup • Lightweight and Portable • Economical - Each Student Can Have Their Own Manikin • Totally Sanitary, One-Piece Lung/Mouth Protection System • Realistic Chest Rise • Unique Airway System Opens and Closes with Proper Technique • Simple-to-Use • Tough and Durable • Rebreathing Airway • Anatomically Correct with Palpable Landmarks

Why Choose the Basic Buddy™ CPR Torso for Your Simulation Lab in India?

The Basic Buddy™ CPR Torso (Item No. 1005637 / W44108, MPN: LF03693U) by Nasco Healthcare, USA is a 2.201 kg, 20 × 37 × 52 cm economical CPR manikin designed for teaching individuals or large groups the life-saving techniques of CPR — affordable enough to give every student their own manikin during training. For BLS certification centres, nursing colleges, schools, corporate first-aid programmes, and community CPR outreach initiatives in India that need to scale CPR training across large groups without the cost of one electronic manikin per trainee, the Basic Buddy™ is the most practical solution for one-manikin-per-student training delivery.

The one-piece, disposable lung/mouth protection bag system makes this manikin completely sanitary — there is no risk of cross-contamination between trainees and no need to sanitise the manikin after each use, which is especially valuable in high-throughput training environments running back-to-back sessions. The airway opens using the head tilt/chin lift method with a visible chest rise on correct ventilation, training the airway opening technique as a visible, confirmable step. The xiphoid process provides an anatomical reference point for correct hand placement and compression technique. The manikin features both adult and child capabilities on a single unit, and is simple to assemble with trouble-free maintenance — a practical advantage for instructors managing equipment across multiple training sessions. The set includes 1 manikin, 10 lung/mouth protection bags, one insertion tool, and an instruction manual. **Important:** only use AED pads specifically designed for foam body manikins with this trainer.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and

dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Can this manikin be used for both adult and child CPR training? A: Yes. The Basic Buddy™ features both adult and child capabilities on a single unit.

Q: What is included in the set? A: One manikin, 10 lung/mouth protection bags, one insertion tool, and an instruction manual.

Q: Can I use any AED training pads with this manikin? A: No. Only use AED pads specifically designed for foam body manikins — other AED pad types may not work correctly or could damage the manikin.
