Jaw Thrust Brad

Item No. 1013162 [W44036]**Weight** 6.8kg**MPN:** 100-2804U / PP02804U / SB41170U[Read More](#)**SKU:****Categories:**BLS Adult

Product Description

Emerging from our very successful Brad CPR manikin, comes the new Jaw Thrust Brad. This manikin offers all of the dependable characteristics that you've come to expect...durability, economy of purchase, ease of use, and simple function with the overall cost of teaching classes held to a minimum.

- Moveable jaw • Individual mouth piece • Removable chest plate for • One airway per day adolescent and adult CPR • Rugged vinyl skin • Long-lasting foam filling • Replacement parts Size: 28" x 18" x 10" (71 x 46 x 25 cm). Includes kneeling pads and carry bag.

The Jaw Thrust Brad (Item No. 1013162 [W44036] | MPN: 100-2804U / PP02804U / SB41170U) is an economical, durable, and easy-to-use adult CPR and airway management training manikin manufactured by Nasco Healthcare, USA, weighing 6.8 kg and measuring 71 x 46 x 25 cm (28" x 18" x

10"). Emerging from the highly successful Brad CPR manikin range, the Jaw Thrust Brad adds a moveable jaw specifically designed for practicing the jaw thrust maneuver — a critical airway opening technique used in trauma patients where a cervical spine injury is suspected.

Built for economy and durability, this manikin features rugged vinyl skin, long-lasting foam filling, a removable chest plate for easy maintenance, individual disposable mouthpieces for hygienic multi-trainee use, and a one-airway-per-day design for both adolescent and adult CPR training. The manikin is designed to keep the overall cost of teaching CPR classes to a minimum while maintaining high training quality. Replacement parts are readily available. Includes kneeling pads and a carry bag for convenient transport and storage.

Q1. What is the Jaw Thrust Brad used for? It is used for practicing adult CPR and airway management techniques, particularly the jaw thrust maneuver — a critical skill for opening the airway in trauma patients where a cervical spine injury is suspected and head tilt/chin lift cannot be safely performed.

Q2. What is the jaw thrust maneuver and why is it important? The jaw thrust is a technique used to open the airway without extending the neck, making it the preferred method in trauma scenarios where spinal injury is a concern. The Jaw Thrust Brad's moveable jaw allows trainees to practice this technique realistically and repeatedly.

Q3. What makes the Jaw Thrust Brad different from the standard Brad CPR manikin? The Jaw Thrust Brad adds a moveable jaw to the proven Brad manikin design, specifically enabling jaw thrust training. It retains all the core features of the Brad range — rugged vinyl skin, foam filling, removable chest plate, and individual mouthpieces — making it a focused upgrade for airway management training.

Q4. How does the individual mouthpiece system work? Each trainee uses their own disposable individual mouthpiece, ensuring hygienic multi-trainee CPR and rescue breathing practice without any risk of cross-contamination between users.

Q5. What is the one-airway-per-day design? The one-airway-per-day design means a single airway system is used throughout a full day of training, helping keep the overall cost of running CPR classes low while maintaining training effectiveness.

Q6. Is this manikin suitable for both adolescent and adult CPR training? Yes, the Jaw Thrust Brad supports both adolescent and adult CPR training, making it versatile for a wide range of BLS training programs.

Q7. What is included with the Jaw Thrust Brad? The package includes the Jaw Thrust Brad manikin, kneeling pads, and a carry bag for convenient transport and storage during training sessions.

Q8. Are replacement parts available? Yes, replacement parts for the Jaw Thrust Brad are readily available, helping extend the lifespan of the manikin and keeping long-term training costs low.

Q9. Who is this manikin ideal for? It is ideal for medical colleges, nursing institutes, BLS certification centers, emergency medical training organizations, first aid courses, and any training facility seeking an affordable, durable manikin for adult CPR and jaw thrust airway management training.

Q10. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
