CPR Simon® Torso - CPR Skills Trainer with OMNI®

Item No. 1022057
Weight 8.094kg
MPN: S309.M

SKU:

Categories:BLS Adult

Product Description

Quality CPR simulators designed to operate for years. Strong, sturdy construction with full-size, realistic landmarks and one piece disposable airways. Prewired for CPRLink™ for a first class BLS program. Multiple pulses: Multiple pulse points; carotid and femoral arterial pulse points. Realistic eyes: Eyes open and close; one pupil is dilated. Airway management: Airway allows the passage of a cuffed ET tube. BVM: Realistic chest rise during ventilation. Realistic chest cavity: Realistic chest cavity containing realistic organs CPR: Omni™ Code Blue® pack monitors and logs the cadence and depth of cardiac compression and airway ventilation. Features

- Totally disposable airways to practice hygienic mouth-to-mouth ventilation
- Fully articulating head, neck, and jaw permitting head/tilt, chin lift, jaw thrust, and neck extension into the “sniffing” position

- Airway blocked when head is forward
- Easily accessible chest cavity with ribcage, lungs, and heart for realism and practice of the Heimlich maneuver
- Realistic chest rise during ventilation
- Carotid and femoral arterial pulse sites
- Eyes open and close; one pupil is dilated
- 10 disposable airways
- Detachable at waist for easy storage
- Instruction Manual
- Carrying bag

Why Choose the CPR Simon® Torso – CPR Skills Trainer with OMNI® for Your Simulation Lab in India?

The CPR Simon® Torso – CPR Skills Trainer with OMNI® (Item No. 1022057, MPN: S309.M) by Gaumard Scientific, USA is an 8.094 kg quality CPR torso simulator built for years of reliable use, with full-size realistic anatomical landmarks, one-piece disposable airways, and — unlike the base CPR Simon Torso Simulator (S308.M) — the integrated **OMNI™ Code Blue® pack**, which monitors and logs the cadence and depth of cardiac compression and airway ventilation. For ACLS training centres, hospital in-service programmes, and nursing institutes in India that need objective, data-logged CPR quality assessment on a torso platform without the cost of a full-body simulator, this is the correct tier in the Simon® family.

The fully articulating head, neck, and jaw permit head tilt, chin lift, jaw thrust, and neck extension into the "sniffing" position, with the airway correctly blocked when the head is forward. The airway allows passage of a cuffed ET tube for advanced intubation training. An easily accessible chest cavity containing realistic organs supports Heimlich manoeuvre practice, and realistic chest rise confirms effective bag-valve-mask ventilation. Carotid and femoral arterial pulse sites support pulse assessment training, and responsive eyes open and close with one pupil dilated. The OMNI® Code Blue® monitoring is the defining upgrade over the base torso — giving instructors logged, objective CPR performance data for competency documentation rather than relying solely on visual assessment. The torso detaches at the waist for easy storage. Includes 10 disposable airways, an instruction manual, and a carrying bag.

For training programmes that also need femoral venous access and IM injection sites, the full-body CPR Simon® platforms (1017559 and 1009220) extend training to vascular access and injection technique, with 1009220 combining full-body capability with the same OMNI® Code Blue monitoring.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Gaumard Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and

dedicated after-sales support.

Frequently Asked Questions

Q: How does this differ from the base CPR Simon Torso Simulator (1005819)? A: This version (1022057) adds the OMNI® Code Blue pack, which monitors and logs compression and ventilation cadence and depth — the base torso (1005819) does not include this electronic monitoring.

Q: Does this torso include femoral venous or IM injection sites? A: No. This torso has CPR, disposable airway, carotid/femoral pulse sites, and OMNI® monitoring only. For femoral venous and IM sites, see the full-body CPR Simon® platforms (1017559 / 1009220).

Q: What does the OMNI® Code Blue pack provide? A: It monitors and logs the cadence and depth of cardiac compression and airway ventilation, giving instructors objective, data-driven CPR quality feedback.
