HAL® Airway, CPR, and Auscultation Skills Trainer

Item No. 1022061
MPN: S315.300.M2.M

[Read More](#)

SKU:

Categories:BLS Adult

Product Description

The perfect trainer for practicing fundamental intubation and CPR skills. Features a life-like airway and a durable chest recoil system. It is CPR and Omni® Code Blue Pack (M-1020211) compatible, thus

capable of providing real-time CPR quality feedback and reporting.

- Nasal and oral Intubation: ETT, LMA, King LT®
- Gastric distension with oesophageal intubation
- Nasal passage permits placement of NP tube

	HAL® Adult Airway and CPR Trainer	HAL® Adult Multipurpose Airway and CPR Trainer	HAL® Airway, CPR, and Auscultation Skills Trainer	HAL® Adult Multipurpose Airway and CPR Trainer	HAL® CPR+D Trainer with advanced feedback
Item No.	1019855	1019856	1022061	1022062	1018867
Manually open or close eyes	Yes	Yes	Yes	Yes	Yes
Realistic head tilt/chin lift and jaw thrust	Yes	Yes	Yes	Yes	Yes
CPR hand positioning landmarks	Yes	Yes	Yes	Yes	Yes
Chest compressions generate palpable carotid pulses	manual	manual	manual	-	manual
Spontaneous breathing	-	-	-	-	Yes
Chest rise	Yes	Yes	Yes	Yes	Yes
Stomach rise	Yes	Yes	Yes	Yes	-
Nasal and oral intubation - ETT, LMA, King LT®	Yes	Yes	Yes	Yes	Yes
Right mainstem intubation presents unilateral chest rise	Yes	Yes	Yes	Yes	Yes
Tongue edema	-	-	-	Yes	-
Laryngospasm	-	Yes	-	Yes	-
Pharyngeal	-	-	-	Yes	-
Tracheostomy and cricothyrotomy	-	Yes	-	Yes	-
Bilateral chest tube sites at fifth intercostal space	-	-	-	Yes	-

Bilateral needle decompression site at second intercostal space with audible hiss	-	-	-	Yes	-
Programmable heart and lung sounds	-	-	Yes	-	-
Detectable EKG rhythm using real AED	-	-	-	-	Yes
Defibrillate and cardiovert using real energy	-	-	-	-	Yes
Carrying bag	included	included	included	included	included

The HAL® Airway, CPR, and Auscultation Skills Trainer (Item No. 1022061 | MPN: S315.300.M2.M) by Gaumard Scientific is the perfect trainer for practicing fundamental intubation, CPR, and cardiac/pulmonary auscultation skills in a single, highly realistic manikin. Building on the core features of the HAL® Adult Airway and CPR Trainer, this model adds a unique advantage — programmable heart and lung sounds — making it the only model in the HAL® series to support dedicated auscultation training alongside full airway management and CPR practice.

Key features include a lifelike airway with nasal and oral intubation support for ETT, LMA, and King LT® devices, gastric distension with oesophageal intubation, nasal passage for NP tube placement, realistic head tilt/chin lift and jaw thrust, visible chest rise and stomach rise, right mainstem intubation presenting unilateral chest rise, manually openable and closable eyes, palpable carotid pulse generated by chest compressions, CPR hand positioning landmarks, and a durable chest recoil system. Compatibility with the Omni® Code Blue Pack (M-1020211) enables real-time CPR quality feedback and detailed reporting. Comes with a carrying bag.

Q1. What is the HAL® Airway, CPR, and Auscultation Skills Trainer used for? It is used for practicing airway management, intubation, CPR, and cardiac and pulmonary auscultation skills in one comprehensive trainer. It is suitable for EMS professionals, medical and nursing students, and ACLS/BLS certification training.

Q2. What makes this model unique compared to other HAL® trainers? This is the only HAL® model that includes programmable heart and lung sounds, enabling dedicated auscultation training alongside full airway management and CPR practice — making it a step up from the standard HAL® Adult Airway and CPR Trainer (1019855).

Q3. What airway management procedures can be practiced? Trainees can practice nasal and oral intubation using ETT, LMA, and King LT® devices, NP tube placement, head tilt/chin lift, jaw thrust, and

bag-valve-mask ventilation. Right mainstem intubation is simulated by unilateral chest rise.

Q4. What does compatibility with the Omni® Code Blue Pack add? When paired with the Omni® Code Blue Pack (M-1020211, sold separately), the trainer can provide real-time CPR quality feedback and detailed performance reporting, elevating it to a full BLS assessment and training tool.

Q5. Does this trainer simulate gastric distension? Yes, the manikin simulates gastric distension when oesophageal intubation occurs, giving trainees immediate feedback that the tube has been incorrectly placed in the oesophagus rather than the trachea.

Q6. How does this model compare to other HAL® trainers? Compared to the entry-level HAL® Adult Airway and CPR Trainer (1019855), this model adds programmable heart and lung sounds. The HAL® Adult Multipurpose Airway Trainer (1019856) adds laryngospasm and tracheostomy, while the HAL® CPR+D Trainer (1018867) adds real AED/defibrillation and spontaneous breathing.

Q7. Is a carrying bag included? Yes, a carrying bag is included with the trainer, making it easy to transport between classrooms, simulation labs, and training venues.

Q8. Who is this trainer ideal for? It is ideal for medical colleges, nursing institutes, EMS training programs, ACLS and BLS certification centers, and any simulation facility that requires combined airway management, CPR, and auscultation skills training in a single portable manikin.

Q9. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
