SKU:

Categories:BLS Adult

Product Description

This unit allows students to practice realistic device operation using AHA recommended training scenarios. An identical graphical operator interface and complete audio and visual prompts mimic the AED Plus in its look and operation. Screen messages, audible tones, and voice prompts guide the user through all aspects of the rescue from arrival on scene and calling for help to administering CPR and shock delivery. The convenient handheld remote control for instructor use is preprogrammed with the eight American Heart Association Heartsaver AED training scenarios and offers a manual scenario function, plus attach pads, low battery, and call-for-service simulations. The training unit is powered by six "C" cell batteries (not included) or an AC adapter. Supplied with training electrode kit, training remote control, AC adapter, handheld cord, operator manual, administration guide and carry bag.

Shipped in two boxes. 28" x 17" x 10", and 17" x 12" x 16".

Why Choose the ZOLL AED Trainer Package with CPR Brad for Your Simulation Lab in India?

The ZOLL AED Trainer Package with CPR Brad (Item No. 1018859, MPN: 2830EXP / 100-2830U / PP02830U / SB45003U) by Nasco Healthcare, USA is an 11.2 kg complete AED and CPR training package combining a ZOLL AED Plus trainer unit with a Brad™ CPR manikin. The trainer replicates the genuine ZOLL AED Plus graphical operator interface with complete audio and visual prompts, allowing students to practise realistic device operation using AHA-recommended training scenarios. For BLS certification centres, hospital in-service programmes, corporate first-aid training, and community AED outreach programmes in India that train on or deploy ZOLL AED Plus units, this trainer eliminates the risk of using a live device during training while replicating the exact operator experience trainees will encounter in a real emergency.

Screen messages, audible tones, and voice prompts guide the user through the complete rescue sequence — from arrival on scene and calling for help, through to administering CPR and shock delivery — exactly as the real ZOLL AED Plus would. A handheld remote control for instructor use comes preprogrammed with the eight American Heart Association Heartsaver AED training scenarios, plus a manual scenario function and simulations for pad attachment, low battery, and call-for-service conditions — giving instructors full control over scenario variety and difficulty during a training session. The unit operates on six "C" cell batteries (not included) or an AC adapter, suiting both field and classroom training settings.

Supplied with a training electrode kit, training remote control, AC adapter, handheld cord, operator manual, administration guide, and carry bag. Shipped in two boxes (28" x 17" x 10" and 17" x 12" x 16") for organised handling on arrival.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: Does this trainer accurately replicate the real ZOLL AED Plus? A: Yes. The graphical interface, audio prompts, and voice guidance mimic the AED Plus in look and operation, providing realistic device familiarisation without using a live unit.

Q: How many training scenarios are included? A: The handheld remote is preprogrammed with the eight American Heart Association Heartsaver AED training scenarios, plus a manual scenario function and pad/battery/call-for-service simulations.

Q: What is included in the package? A: A training electrode kit, training remote control, AC adapter, handheld cord, operator manual, administration guide, and carry bag — shipped in two boxes.
