Product Description

Why Choose the Defib Adapter Posts for Your Simulation Lab in India?

The Defib Adapter Posts (Item No. 1017295, MPN: LF03670BU) by Nasco Healthcare, USA are 0.99 kg genuine OEM defibrillation electrode adapter posts for the Life/form® defibrillation-capable manikin family — the manikin-side mounting hardware that accepts the training defibrillator cables or reusable pad adapters used during defibrillation training sessions. The adapter posts are the interface between the defibrillator's training cables or pads and the manikin's defibrillation circuit — without correctly functioning posts, defibrillation training on the compatible manikin cannot proceed.

For ACLS training centres, BLS certification centres with defibrillation training capability, and hospital in-

service programmes in India running defibrillation training on Life/form® defibrillation-capable manikins, maintaining a spare set of adapter posts eliminates training interruption when the installed posts are damaged or worn — a failure mode that is difficult to diagnose until training has already been disrupted. The adapter posts work in combination with the Adapter with Control Training Cables (1017990 / LF03962U), which provides the cable set that connects the defibrillator to these posts. Order both to maintain a complete spare defibrillation training interface. Only genuine OEM LF03670BU posts are guaranteed to match the manikin's defibrillation circuit geometry and connection specifications — ensuring reliable energy transfer and safety during training sessions.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: What do Defib Adapter Posts do? A: They are the manikin-side electrode mounting posts that accept training defibrillator cables or reusable pad adapters during defibrillation training, forming the interface between the defibrillator and the manikin's defibrillation circuit.

Q: Do I need the Adapter with Control Training Cables as well? A: The Defib Adapter Posts (LF03670BU) are the manikin-side hardware; the Adapter with Control Training Cables (1017990 / LF03962U) provides the cable set that connects the defibrillator to these posts. For a complete defibrillation training interface, both are required.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. Confirm your manikin model before ordering.
