Categories:BLS Adult

Product Description

Training for AHA scenarios: • Provides both audio and written prompts in English • Cables for training pads plug into the rear of the unit • Volume adjustment • Large LCD display for written prompts • Low battery indication • Powered by a 9V battery Prepare students for emergency situations with the Life/form® Universal AED Trainer. Simply push a button to set the sequence of events that will help students learn the appropriate steps to follow in both “shock” and “no shock” situations. The instructor can select from four training scenarios for manual and hands-free training. Once the scenario is selected, the trainer will prompt the student in appropriate actions and responses. Lightweight, compact trainer comes with reusable pads and electrode sets, 9V battery, and operating instructions. Brad™ CPR Manikin: This economical CPR manikin is constructed of soft, realistic vinyl plastic over polyurethane foam for a “human” feel. Features include: a longer torso for realistic abdominal thrusts, realistic head tilt and chin lift for opening airway, can easily be manipulated to realistically simulate airway obstruction or choking situations, and a user-friendly lung/airway design that eliminates

cleaning. Includes three mouth/nose pieces and three disposable lung/airway systems. Nylon carry bag and kneeling pads included.

The Life/form® AED Trainer with Brad™ CPR Manikin (Item No. 1018858 | MPN: LF03741U) is a comprehensive combined AED and CPR training package weighing 9.5 kg, manufactured by Nasco Healthcare, USA. It pairs the Life/form® Universal AED Trainer with the highly popular and durable Brad™ CPR Manikin — offering a more realistic, full-bodied CPR training experience compared to the Basic Buddy™ version, making it ideal for programs that require a higher level of hands-on realism.

The **Life/form® Universal AED Trainer** prepares students for real emergency situations with audio and written prompts in English, a large LCD display, volume adjustment, and low battery indication. Instructors can select from four training scenarios for both manual and hands-free training, covering "shock" and "no shock" response situations. It is updated with 2005 AHA Guidelines and comes with reusable pads and electrode sets, a 9V battery, and operating instructions.

The **Brad™ CPR Manikin** is an economical yet highly realistic CPR manikin constructed of soft vinyl plastic over polyurethane foam for a true human feel. It features a longer torso for realistic abdominal thrust practice, realistic head tilt and chin lift for airway opening, the ability to simulate airway obstruction or choking scenarios, and a user-friendly lung/airway design that eliminates the need for cleaning. Includes 3 mouth/nose pieces, 3 disposable lung/airway systems, a nylon carry bag, and kneeling pads.

Q1. What is the Life/form® AED Trainer with Brad™ CPR Manikin used for? It is a combined training package used to teach AED operation and CPR skills together. The AED trainer guides students through cardiac emergency scenarios, while the Brad™ CPR manikin provides realistic hands-on CPR and choking relief practice.

Q2. How does this differ from the Life/form® AED Trainer with Basic Buddy™ (1018857)? The key difference is the CPR manikin included. This package (1018858) includes the Brad™ CPR Manikin — a more realistic, full-bodied vinyl manikin with a longer torso, human feel, and airway obstruction capability. The Basic Buddy™ package (1018857) uses a simpler, more economical disposable-airway manikin better suited for large group training.

Q3. How many AED training scenarios does the trainer support? The Life/form® Universal AED Trainer supports four training scenarios covering both "shock" and "no shock" situations for manual and hands-free training modes, helping students learn the correct response sequence in a wide range of cardiac emergency scenarios.

Q4. What prompts does the AED trainer provide? It provides audio and written prompts in English

displayed on a large LCD screen, guiding students step-by-step through each AED training scenario — simulating a real AED experience in a safe training environment.

Q5. What makes the Brad™ manikin ideal for CPR training? The Brad™ manikin is constructed of soft, realistic vinyl plastic over polyurethane foam for a genuine human feel. Its longer torso allows realistic abdominal thrust practice, and it can be manipulated to simulate airway obstruction and choking — making it versatile for both CPR and first aid training.

Q6. Does the Brad™ manikin require sanitizing between uses? No. The user-friendly lung/airway design eliminates the need for cleaning between users, while individual disposable mouth/nose pieces and lung/airway systems maintain hygiene across multiple trainees.

Q7. What is included in this package? The package includes the Life/form® Universal AED Trainer (reusable pads, electrode sets, 9V battery, and operating instructions) and the Brad™ CPR Manikin (3 mouth/nose pieces, 3 disposable lung/airway systems, nylon carry bag, and kneeling pads).

Q8. Are the AED trainer guidelines up to date? Yes, the Life/form® Universal AED Trainer is updated with 2005 AHA Guidelines for CPR and emergency cardiovascular care training.

Q9. Who is this package ideal for? It is ideal for first aid training institutes, BLS and AED certification programs, corporate safety training, medical colleges, nursing institutes, and emergency response teams that need a complete, realistic, and affordable combined AED and CPR training solution.

Q10. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
