CPR

Item No.	1022071 [P71PRO+]
Weight	13.5kg
Dimensions	78 x 39 x 26 cm
Brand	3B Scientific

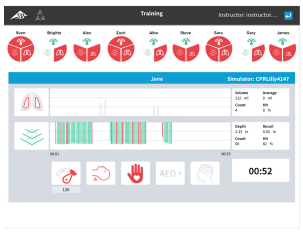
Categories:BLS Adult



Product Description

Prepare student for the real emergency Performing CPR is tough, quickly strains energy and nerves. However, knowing what to do in an emergency can save the life of a friend, family member or a stranger. The new Quality CPR training manikin offered by 3B Scientific enables instructors and healthcare providers to measure, monitor and analyze the CPR performance of up to 10 trainees at a time. CPRLilly Pro+ helps instructors increase effectiveness and efficiency in their CPR courses by connecting with the free CPRLilly App on tablet to follow the CPR performance and deliver objective feedback leading to Quality CPR training (App available on Apple and Google play). It also enables trainees to see and monitor their own performance in real-time with the student view of the App. LED lights located directly on manikin's neck provide direct CPR feedback and indicate correct compressions parameters (depth, release and rate). The easy to use App lets the instructor and trainees review CPR performance in real-time. Trainee performance can be tested with the results being saved for further analysis and debriefing. Quality CPR Feedback:

- Compression depth
- Compression rate
- Compression fraction
- Chest complete release
- Correct hand placement
- Jaw thrust and head tilt control
- Appropriate ventilation volume

Key Training Features:

- Quality CPR feedback with debriefing history
- Mouth-to-mouth & mouth-to-nose ventilation
- Ventilation with face shield, pocket mask and BVM
- Chest rise with proper ventilation
- Control of proper airway desobstuction
- Carotid pulses
- AED pads placement training capable
- Free App available on google play and iOS
- Constant analysis of CPR parameters for up to 10 manikins simultaneously
- Individual review possibility in group training for more efficient training
- Adaptable to different course concepts • Simplified student feedback view available with the CPRLilly App

Solid manikin for effective training:

- Made in Germany of extremely durable, latex free material
- Face masks and lungs bags can be changed easily without tools
- Easy to clean with hygienic airway system
- Runs quietly with efficient power usage and rechargeable battery
- Stable WiFi connection and intuitive App interface
- Practical carrying bag with training mat for comfortable practise
- Dark skin manikin available

Upgrade now and equip your courses with direct feedback CPR training manikins to comply with AHA's guidelines. CPRLilly PRO+ meets the requirements for direct feedback and Quality CPR in the AHA guidelines: "Instrumented directive feedback device measures compression rate, depth, hand position, recoil and chest compression fraction and provides real-time audio or visual feedback (or both) on these critical CPR skills." Delivery content: 1 CPRLilly PRO+ training manikin, 1 tablet, 1 charger and battery, 4 lower face masks, 25 throat bags, 12 AED-Pad adapters, 1 carrying bag with training mat

Why Choose the CPRLilly PRO+ CPR Training Manikin for Your Simulation Lab in India?

The CPRLilly PRO+ (Item No. 1022071 / P71PRO+) by 3B Scientific, Germany is a 13.5 kg, 78 × 39 × 26 cm next-generation CPR training manikin that enables instructors to measure, monitor, and analyse the CPR performance of up to 10 trainees simultaneously through the free CPRLilly App (available on Apple and Google Play) — the multi-trainee monitoring upgrade over the single-tablet CPRLilly PRO™ (P71). For ACLS training centres, nursing colleges, and large-scale CPR certification programmes in India that train groups rather than individuals, CPRLilly PRO+ delivers objective, data-driven feedback across an entire cohort in real time, with trainees also able to view their own performance via the student view of the app.

LED lights located directly on the manikin's neck provide immediate, equipment-free CPR feedback indicating correct compression parameters — depth, release, and rate — visible to the trainee without needing to look at a screen. The app extends this with full Quality CPR Feedback across compression depth, compression rate, compression fraction, chest complete release, correct hand placement, jaw thrust and head tilt control, and appropriate ventilation volume — with results saved for debriefing and further analysis. CPRLilly PRO+ explicitly meets the AHA guideline requirement for an "instrumented directive feedback device" that measures compression rate, depth, hand position, recoil, and chest compression fraction with real-time audio or visual feedback.

Key training capabilities include mouth-to-mouth and mouth-to-nose ventilation, ventilation training with face shield, pocket mask, and BVM, visible chest rise with proper ventilation, airway obstruction control, carotid pulse assessment, and AED pad placement training. Made in Germany from extremely durable, latex-free material, with face masks and lung bags that change easily without tools, hygienic easy-clean airway system, quiet rechargeable battery operation, and stable WiFi connectivity. A dark skin

manikin variant is also available. Delivery includes 1 CPRLilly PRO+ manikin, 1 tablet, charger and battery, 4 lower face masks, 25 throat bags, 12 AED-pad adapters, and a carrying bag with training mat.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: How many trainees can be monitored simultaneously? A: Up to 10 trainees' CPR performance can be measured, monitored, and analysed simultaneously through the free CPRLilly App.

Q: Does this manikin meet AHA direct feedback requirements? A: Yes. CPRLilly PRO+ meets the AHA guideline requirement for an instrumented directive feedback device measuring compression rate, depth, hand position, recoil, and chest compression fraction with real-time feedback.

Q: Is a dark skin tone variant available? A: Yes. Contact us at sem@semtrainers.com or +91-88495 63724 for the dark skin manikin variant.
