Product Description

Why Choose the CPR Lillipro™ with Tablet for Your Simulation Lab in India?

The CPR Lillipro™ with Tablet (Item No. 1017773 / P71) by 3B Scientific, Germany is a 13.5 kg, 78 ×

39 × 26 cm premium software-driven CPR trainer with an included Android training tablet — the most technologically advanced CPR platform in this category, designed specifically for professional CPR training courses. Using the tablet software, instructors can guide exercises, control the simulator, and create highly realistic training scenarios, with all relevant parameters monitored and stored for subsequent analysis. For ACLS training centres, nursing colleges, and hospital in-service programmes in India that need detailed, data-driven CPR competency assessment with permanent session records, CPRLillyPRO™ delivers a level of training documentation that visual-feedback-only manikins cannot match.

Developed and manufactured in Germany, CPRLillyPRO™ complies with both AHA (American Heart Association) and ERC (European Resuscitation Council) guidelines — a dual-standard compliance relevant for India's growing international accreditation and exchange training programmes. The tablet displays six feedback parameters in real time: compression depth, compression frequency, hand position, head tilt, respiration volume/speed (combined), and respiration pressure — giving trainers and trainees the complete CPR quality picture in one interface. The manikin can open its eyes when spoken to by the trainee, the movable jaw demonstrates the jaw thrust manoeuvre, and an individually palpable carotid pulse adds realism to pulse-check assessment. The upper body is dressed in everyday clothing with a zip jacket, presenting all important anatomical reference points in a realistic patient context rather than a bare training torso.

Hygienic and economical to operate long-term thanks to disposable airbags and a separate air chamber system, with exchangeable, easy-to-clean face masks. The delivery set includes 5 lower face masks (with teeth), 25 throat bags, a carry case, a tracksuit top, an Android tablet PC, plug adaptor, and charger.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: What feedback parameters does the tablet display? A: Compression depth, compression frequency, hand position, head tilt, respiration volume/speed (combined), and respiration pressure — all displayed and stored for analysis on the included Android tablet.

Q: Does this manikin support jaw thrust training? A: Yes. The movable jaw demonstrates the jaw thrust manoeuvre, and the realistic head tilt and individual carotid pulse round out advanced airway training capability.

Q: What is included? A: 5 lower face masks (with teeth), 25 throat bags, a carry case, a tracksuit top,

an Android tablet PC, a plug adaptor, and a charger.

CPRLillyPRO™ including the **training tablet** is the best choice for your professional CPR training courses. Using the software, you can guide the exercises and control the simulator, creating highly realistic training scenarios. All the relevant parameters can be monitored comfortably and easily via the tablet provided, and stored away for subsequent analysis. Trainers and trainees will very quickly attain the chosen training target via the direct feedback feature. CPRLillyPRO™ is hygienic, and will operate economically for a long time thanks to the use of disposable airbags and the separate air chamber system. The [face masks](#) can be exchanged, and are easy to clean. The software can control the carotid pulse and the eye movements. All material used complies with the highest standards in terms of quality and durability. The CPRLillyPRO™ CPR trainer has been developed and manufactured in Germany, and training with this manikin complies with the latest AHA (American Heart Association) and ERC (European Resuscitation Council) guidelines. Displayed feedback parameters on the included training tablet:

- Compression depth
- Compression frequency
- Hand position
- Head tilt
- Respiration volume/speed (combined)
- Respiration pressure

CPRLillyPRO™ can react by opening the eyes when spoken to by the trainee. The upper body, dressed in everyday clothing with a zip jacket, shows all the important anatomical reference points. The correct head tilt, individual carotid pulse, and the moveable jaw (demonstrate Jaw Thrust Manoeuvre), provide realistic scenarios. CPR training with the CPRLillyPRO™ line of CPR manikins complies with the latest AHA (American Heart Association) and ERC (European Resuscitation Council) guidelines. Delivery contents:

- 5 Lower face masks (including teeth)
- 25 Throat bags
- 1 Carry case
- 1 Tracksuit top
- 1 Android tablet PC (version P71)
- 1 Plug adaptor for the charger (version P71)
- 1 Charger (version P71)
