Product Description

This unit allows students to practice realistic device operation using AHA recommended training scenarios. An identical graphical operator interface and complete audio and visual prompts mimic the AED Plus in its look and operation. Screen messages, audible tones, and voice prompts guide the user through all aspects of the rescue from arrival on scene and calling for help to administering CPR and shock delivery. The convenient handheld remote control for instructor use is preprogrammed with the eight American Heart Association Heartsaver AED training scenarios and offers a manual scenario function, plus attach pads, low battery, and call-for-service simulations. The training unit is powered by six “C” cell batteries (not included) or an AC adapter. Supplied with training electrode kit, training remote control, AC adapter, handheld cord, operator manual, administration guide and carry bag. Shipped in two boxes. 28" x 17" x 10", and 17" x 12" x 16".

The **ZOLL AED Trainer Package with CPR Brad™ (Item No. 1018859 / MPN: 2830EXP)** by ZOLL Medical, USA is a complete, ready-to-deploy BLS training bundle combining the authentic ZOLL AED Plus

trainer with the Brad™ full-body adult CPR manikin — everything needed to run a professional combined CPR and AED training station straight from the box. For institutions that use ZOLL AED Plus devices in their clinical environment, this is the definitive bundle: trainees build device-specific AED familiarity on the exact interface they will operate in a real emergency, while simultaneously developing hands-on CPR technique on a realistic full-body manikin.

Component 1: ZOLL AED Trainer

An exact replica of the ZOLL AED Plus in graphical interface, look, and operation — the most widely deployed AED in clinical settings globally.

- **Identical graphical interface to ZOLL AED Plus** — same screen layout, button placement, icons, and display messages; direct muscle-memory transfer to the real device
- **Complete audio and visual prompts** — screen messages, audible tones, and voice prompts guide trainees through every step: scene arrival, calling for help, CPR delivery, pad placement, and shock administration
- **8 pre-programmed AHA Heartsaver AED scenarios** — full range of cardiac arrest presentations plus manual scenario function for instructor customisation
- **Instructor remote control included** — pre-programmed with all 8 scenarios; includes "Attach Pads," "Low Battery," and "Call for Service" troubleshooting simulations
- **Dual power** — 6 × C batteries (not included) or AC adapter (included); eliminates battery dependency for fixed lab installations
- **Training electrode kit, handheld cord, operator manual, administration guide, and carry bag included**

Component 2: Brad™ CPR Manikin

A full-body, anatomically realistic adult CPR manikin built for professional-grade BLS training with a realistic human feel.

- **Soft vinyl plastic over polyurethane foam** — realistic human feel during chest compressions and rescue breathing
- **Extended torso** — enables abdominal thrust (Heimlich manoeuvre) practice alongside CPR
- **Realistic head tilt and chin lift** — accurate airway opening technique
- **Airway obstruction simulation** — manikin can be manipulated to simulate choking or partial airway

obstruction
- **Disposable lung/airway system** — no cleaning required between students; simply replace the disposable unit
- **3 mouth/nose pieces and 3 disposable lung/airway systems included**
- **Nylon carry bag and kneeling pads included**

Why This Bundle vs the ZOLL AED Trainer Standalone (100-8008): The standalone unit (100-8008) includes only the AED trainer and its accessories. This package adds the Brad™ full-body CPR manikin — making it a complete, single-SKU procurement for institutions setting up a new BLS training station from scratch.

Package Ships in Two Boxes:

- Box 1 (Brad™ Manikin): 71.1 × 43.2 × 25.4 cm
- Box 2 (ZOLL AED Trainer): 43.2 × 30.5 × 40.6 cm
- Combined weight: 11.2 kg

Ideal For:

- NMC/INC-compliant BLS and ACLS skills stations requiring combined ZOLL-brand AED and CPR manikin training
- Medical colleges and nursing institutes standardised on ZOLL AED Plus devices
- Institutions setting up new BLS training stations wanting a complete out-of-box solution
- Hospital in-service BLS training and code blue preparedness programmes
- Emergency medicine, critical care nursing, and paramedic training programmes

Specification	Detail
Item No.	1018859
MPN	2830EXP (100-2830U / PP02830U / SB45003U)
Weight	11.2 kg (combined)
Make	ZOLL Medical, USA
AED Replicates	ZOLL AED Plus
AED Scenarios	8 AHA Heartsaver + manual function
Remote Control	Included
AED Power	6 × C batteries (not included) + AC adapter (included)
Manikin	Brad™ full-body adult CPR manikin
Lung/Airway Systems	3 disposable units included
Warranty	1-year limited (AED trainer)

Q: What is included in this package? A: The ZOLL AED Trainer with training electrode kit, instructor remote control, AC adapter, handheld cord, operator manual, administration guide, and carry bag; plus the Brad™ CPR Manikin with 3 mouth/nose pieces, 3 disposable lung/airway systems, nylon carry bag, and kneeling pads. Ships in two boxes.

Q: What AED device does the trainer replicate? A: It is a training replica of the ZOLL AED Plus — replicating its graphical interface, screen messages, audible tones, and voice prompts exactly. Institutions that have deployed ZOLL AED Plus devices in their clinical settings benefit most from this package, as trainees develop direct familiarity with the precise device they will operate in a real emergency.

Q: How many training scenarios are included? A: Eight pre-programmed AHA Heartsaver AED scenarios covering shockable and non-shockable cardiac arrest presentations, plus a manual scenario function for instructor-customised training sequences.

Q: Can this package also train Heimlich/abdominal thrust technique? A: Yes. The Brad™ manikin has an extended torso specifically designed for abdominal thrust (Heimlich manoeuvre) practice, allowing instructors to cover choking and airway obstruction management alongside CPR and AED — making this a more versatile BLS station than packages with torso-only manikins.

Q: Does the manikin require sanitisation between students? A: No. The Brad™ uses a disposable lung/airway system and separate mouth/nose pieces that are replaced between students. Three complete sets are included.

Q: Can the AED trainer run on mains power without batteries? A: Yes. The included AC adapter allows mains power operation — eliminating battery management for fixed skills lab installations. Batteries (6 × C) are not included but enable portable use when required.

Q: Is this suitable for NMC-compliant BLS skills labs in India? A: Yes. The ZOLL AED Trainer Package fulfils NMC-compliant BLS and ACLS AED skills station requirements, and the Brad™ manikin's additional Heimlich capability supports a broader first aid competency scope within the same station.
