SKU:

Categories:AED Trainers

Product Description

Training for AHA scenarios:

- Provides both audio and written prompts in English
- Cables for training pads plug into the rear of the unit • Volume adjustment
- Large LCD display for written prompts
- Dimensions: 7-1/2" x 5" x 1-3/4"
- Low battery indication
- Powered by a 9V battery

Nasco Life/form® Universal AED Trainer: Prepare students for emergency situations with the Nasco Universal AED Trainer. Simply push a button to set the sequence of events that will help students learn the appropriate steps to follow in both "shock" and "no shock" situations. The instructor can select from four training scenarios for manual and hands-free training. Once the scenario is selected, the trainer

will prompt the student in appropriate actions and responses. Lightweight, compact trainer comes with reusable pads and electrode sets, 9V battery, and operating instructions. Updated with 2005 AHA Guidelines. **Basic Buddy™ CPR Manikin:** The Basic Buddy™ CPR Manikin is a dramatic, inexpensive, and state-of-the-art manikin designed for teaching individuals or large groups the life-saving techniques of CPR. This manikin offers a realistic and affordable way to provide each student with their own CPR manikin. The one-piece, disposable lung/mouth protection system makes this manikin completely sanitary - there is no risk of cross contamination and no need to sanitize the manikins after use! The airway opens using the head tilt/chin lift method, and there is a visible chest rise when ventilated. The xiphoid process provides an anatomical reference point for hand placement and compressions. The manikin also features both adult and child capabilities. Basic Buddy™ manikin is simple to assemble and provides trouble-free maintenance. Consists of one manikin, 10 lung/mouth protection bags, one insertion tool, and an instruction manual.

The **Life/form® AED Trainer with Basic Buddy™ CPR Manikin (Item No. 1018857 / MPN: LF03742U)** by Nasco Healthcare, USA is a complete, value-packed BLS training bundle combining a universal AED trainer and a full adult CPR manikin in a single package. Purpose-built for institutions that need to deliver combined CPR and AED training efficiently, this kit eliminates the need to source equipment from multiple suppliers and delivers everything required for a compliant, hands-on BLS skills station.

Component 1: Life/form® Universal AED Trainer

A compact, instructor-friendly AED training device designed to simulate the AHA cardiac arrest response protocol.

- **4 selectable training scenarios** — covers both "shock advised" and "no shock advised" situations for varied learning outcomes
- **Audio and written prompts in English** — large LCD display shows written instructions; audio guides trainees through each step simultaneously
- **Hands-free and manual training modes** — supports both self-directed student practice and instructor-led scenarios
- **Reusable training pads and electrode sets** — cable-connected, plugging into the rear of the unit for realistic pad placement practice
- **Volume adjustment** — suitable for individual or group training environments
- **Low battery indicator** — 9V battery powered (included)
- **Compact dimensions** — 19 × 12.7 × 4.4 cm; lightweight for easy transport

- **AHA 2005 Guidelines compliant**
-

Component 2: Basic Buddy™ CPR Manikin

A cost-effective, hygienic, full adult CPR training manikin ideal for individual and large-group BLS instruction.

- **One-piece disposable lung/mouth protection system** — completely eliminates cross-contamination risk; no sanitisation required between students
- **Head tilt/chin lift airway opening** — realistic airway manoeuvre technique training
- **Visible chest rise on ventilation** — confirms correct rescue breathing technique
- **Xiphoid process landmark** — guides anatomically correct hand placement for chest compressions
- **Adult and child CPR capabilities** — dual-use for both adult and paediatric BLS training scenarios
- **Simple assembly, minimal maintenance** — one-piece design with no complex components

Package Contents:

- Life/form® Universal AED Trainer with reusable pads, electrode sets, 9V battery, and operating instructions
- Basic Buddy™ CPR Manikin with 10 disposable lung/mouth protection bags, insertion tool, and instruction manual

Ideal For:

- NMC/INC-compliant BLS skills stations requiring both CPR manikin and AED trainer
- Medical college and nursing institute first-year BLS orientation programmes
- Large-group community CPR and AED awareness training
- Institutions equipping multiple stations cost-effectively — each student can have their own manikin
- AYUSH institutions establishing entry-level emergency response simulation capability

Specification	Detail
Item No.	1018857
MPN	LF03742U
Weight	5 kg (combined)
Make	Nasco Healthcare, USA
AED Trainer Dimensions	19 × 12.7 × 4.4 cm

Specification	Detail
AED Trainer Power	9V battery (included)
AED Scenarios	4 pre-programmed
Manikin Type	Full adult; adult + child capable
Lung Bags Included	10 disposable units
AHA Guideline Compliance	2005 ECC Guidelines

Q: What is included in this bundle? A: The kit includes the Life/form® Universal AED Trainer (with reusable training pads, electrode sets, 9V battery, and operating instructions) and the Basic Buddy™ CPR Manikin (with 10 disposable lung/mouth protection bags, insertion tool, and instruction manual) — everything needed to run a complete combined CPR and AED skills station out of the box.

Q: How many AED training scenarios are available? A: The AED trainer includes 4 pre-programmed scenarios covering both "shock advised" and "no shock advised" cardiac arrest situations, allowing instructors to train students across a range of realistic emergency presentations.

Q: Is the manikin hygienic for multi-student group training? A: Yes. The Basic Buddy™ uses a one-piece disposable lung/mouth protection bag system that is replaced between students — eliminating all cross-contamination risk without requiring sanitisation of the manikin itself. This makes it ideal for large-group training where multiple students use the same manikin in a session.

Q: Can this manikin be used for both adult and paediatric CPR training? A: Yes. The Basic Buddy™ supports both adult and child CPR training modes, making it a dual-purpose resource for BLS programmes covering the full age range.

Q: Does the AED trainer work with standard training pads or real AED pads? A: The Life/form® Universal AED Trainer uses dedicated training pads that connect via cable to the rear of the unit. It does not accept real AED pads — it is a standalone training device, not a real-AED-compatible system.

Q: What AHA guidelines does this product comply with? A: The AED trainer is updated to AHA 2005 ECC (Emergency Cardiovascular Care) guidelines. Institutions that require 2020 AHA guideline compliance should verify the current version with SEM Trainers before procurement.

Q: Is this suitable for NMC-compliant BLS skills labs in India? A: Yes. The combined CPR manikin and AED trainer bundle fulfils the core equipment requirements for NMC-compliant BLS skills stations in medical college and nursing institute simulation labs.

Q: Can replacement lung bags be ordered separately? A: Yes. Replacement lung/mouth protection bags for the Basic Buddy™ manikin are available as a separate consumable — contact SEM Trainers to order.
