SKU:

Categories:AED Trainers

Product Description

Training for AHA scenarios: • Provides both audio and written prompts in English • Cables for training pads plug into the rear of the unit • Volume adjustment • Large LCD display for written prompts • Low battery indication • Powered by a 9V battery Prepare students for emergency situations with the Life/form® Universal AED Trainer. Simply push a button to set the sequence of events that will help students learn the appropriate steps to follow in both “shock” and “no shock” situations. The instructor can select from four training scenarios for manual and hands-free training. Once the scenario is selected, the trainer will prompt the student in appropriate actions and responses. Lightweight, compact trainer comes with reusable pads and electrode sets, 9V battery, and operating instructions. Brad™ CPR Manikin: This economical CPR manikin is constructed of soft, realistic vinyl plastic over polyurethane foam for a “human” feel. Features include: a longer torso for realistic abdominal thrusts, realistic head tilt and chin lift for opening airway, can easily be manipulated to realistically simulate

airway obstruction or choking situations, and a user-friendly lung/airway design that eliminates cleaning. Includes three mouth/nose pieces and three disposable lung/airway systems. Nylon carry bag and kneeling pads included.

Same bundle structure as the previous product but with the Brad™ manikin — a step up from Basic Buddy™ in realism and features. The description is one unformatted wall of text. Here's the fully enriched output:

? Product Description

The **Life/form® AED Trainer with Brad™ CPR Manikin (Item No. 1018858 / MPN: LF03741U)** by Nasco Healthcare, USA is a premium BLS training bundle pairing the Life/form® Universal AED Trainer with the Brad™ full-body adult CPR manikin. Designed for institutions that need realistic, hands-on combined CPR and AED training, this bundle upgrades the experience with a more anatomically detailed, full-body manikin that closely simulates the feel of working on a real patient — making it the preferred choice over entry-level manikin bundles for professional medical and nursing education.

Component 1: Life/form® Universal AED Trainer

A compact, instructor-controlled AED training device for AHA-compliant cardiac arrest response training.

- **4 selectable training scenarios** — covers both "shock advised" and "no shock advised" situations
 - **Audio and written prompts in English** — large LCD display for written instructions; simultaneous audio guidance
 - **Manual and hands-free training modes** — instructor-led and self-directed practice supported
 - **Reusable training pads and electrode sets** — cable-connected via rear of unit for realistic pad placement
 - **Volume adjustment** — suitable for individual and group training
 - **Low battery indicator** — 9V battery powered (included)
 - **AHA 2005 Guidelines compliant**
-

Component 2: Brad™ CPR Manikin

A full-body, anatomically realistic adult CPR manikin constructed for professional-grade BLS training.

- **Soft vinyl plastic over polyurethane foam construction** — provides a realistic, human-like feel during chest compressions and rescue breathing

- **Extended torso length** — enables realistic practice of abdominal thrusts (Heimlich manoeuvre) in addition to CPR
- **Realistic head tilt and chin lift** — accurate airway opening technique simulation
- **Airway obstruction simulation** — manikin can be easily manipulated to simulate choking or partial airway obstruction scenarios
- **User-friendly disposable lung/airway system** — eliminates the need for cleaning between students; simply replace the disposable unit
- **3 mouth/nose pieces and 3 disposable lung/airway systems included** — ready for immediate multi-student use
- **Nylon carry bag and kneeling pads included** — complete setup for mobile or in-lab training

Key Differentiator vs Basic Buddy™ Bundle: The Brad™ manikin offers a full-body form factor with realistic vinyl-foam feel, extended torso for Heimlich training, and airway obstruction simulation — significantly higher training fidelity than the torso-only Basic Buddy™. Institutions seeking a more complete and realistic BLS training experience should select this bundle.

Package Contents:

- Life/form® Universal AED Trainer with reusable pads, electrode sets, 9V battery, and operating instructions
- Brad™ CPR Manikin with 3 mouth/nose pieces, 3 disposable lung/airway systems, nylon carry bag, and kneeling pads

Q: What is the key difference between this bundle and the Life/form® AED Trainer with Basic Buddy™? A: The AED trainer component is identical. The difference is the manikin. Brad™ is a full-body adult manikin with soft vinyl-over-foam construction for a realistic human feel, a longer torso for Heimlich/abdominal thrust training, and the ability to simulate airway obstruction scenarios. Basic Buddy™ is a simpler, more economical torso-focused manikin without these features. Brad™ is the better choice for professional medical and nursing education.

Q: What skills can be practised on the Brad™ manikin? A: CPR chest compressions, rescue breathing, head tilt/chin lift airway opening, abdominal thrusts (Heimlich manoeuvre), and airway obstruction recognition and management.

Q: Does the Brad™ manikin require sanitisation between students? A: No. The disposable lung/airway system and separate mouth/nose pieces are replaced between students, eliminating cross-contamination risk without requiring manikin sanitisation. Three complete sets are included.

Q: How many AED training scenarios does this bundle support? A: The Life/form® Universal AED Trainer includes 4 pre-programmed scenarios covering both "shock advised" and "no shock advised" cardiac arrest situations, supporting varied clinical presentations in training.

Q: Can the AED trainer be used independently without the manikin? A: Yes. The Life/form® Universal AED Trainer is a standalone device and can be used with any CPR training manikin. However, this bundle is specifically packaged and priced as a complete combined BLS station kit.

Q: Is this bundle suitable for NMC-compliant BLS skills labs? A: Yes. The combined CPR manikin and AED trainer fulfils core NMC BLS skills station requirements for medical college and nursing institute simulation labs, and the Brad™ manikin's Heimlich capability supports additional first aid competency training within the same station.

Q: Can replacement lung/airway systems be ordered separately? A: Yes. Replacement disposable lung/airway systems and mouth/nose pieces for the Brad™ manikin are available as consumables — contact SEM Trainers to order.

Q: What is included in the carry bag? A: The nylon carry bag contains the Brad™ manikin, kneeling pads, 3 mouth/nose pieces, 3 disposable lung/airway systems. The AED trainer with its accessories is packaged separately.

Ideal For:

- NMC/INC-compliant BLS skills stations requiring combined CPR and AED training with higher-fidelity manikin
- Medical college and nursing institute first and second-year BLS programmes
- Institutions requiring Heimlich manoeuvre and airway obstruction training alongside CPR and AED
- Emergency medicine, paramedic, and first responder training programmes
- Institutions stepping up from basic manikin bundles to professional-grade BLS simulation

Specification	Detail
Item No.	1018858
MPN	LF03741U
Weight	9.5 kg (combined)
Make	Nasco Healthcare, USA
AED Scenarios	4 pre-programmed
AED Power	9V battery (included)
Manikin Construction	Soft vinyl over polyurethane foam
Manikin Type	Full-body adult
Lung/Airway Systems Included	3 disposable units
