Categories:BLS and CPR Accessories

Product Description

In a cardiac emergency it is important to quickly implement lifesaving steps to help the victim. This poster reinforces the basic steps to follow in a cardiac emergency. Help improve the odds of beating sudden cardiac arrest with Defib-posters. A new and unique educational tool designed specifically to educate lay people about topics specific to sudden cardiac emergencies and defibrillation. Designed by experts in medical education, Defib-posters are quality educational material combining detailed medical illustration with simple to understand content. • High quality artwork • Easy-to-understand content • Emphasizes proper emergency protocols • Provides a continuing form of education • Great for posting near an AED or public areas • Reinforce learned skill • Increase emergency preparedness • 18" X 23"

with Heavy lamination

Why Choose the Cardiac Emergency Chart – Laminated for Your Simulation Lab in India?

The Cardiac Emergency Chart – Laminated (Item No. 1018419 / W59503, MPN: DF004L) by Nasco Healthcare, USA is an 18" × 23" (approx. 46 × 58 cm) heavily laminated cardiac emergency reference poster from the Defib-poster series — designed specifically to educate lay people and first responders on the step-by-step response to sudden cardiac arrest, with emphasis on correct emergency protocol and defibrillator use. For BLS training centres, hospitals, schools, corporate offices, community centres, and public AED placement sites in India, this chart provides a permanent, moisture-resistant visual reference for cardiac emergency response that continues to educate and reinforce correct protocol long after a formal BLS training session ends.

The heavy lamination makes this chart suitable for permanent wall display in high-humidity environments — hospital corridors, gym areas, canteen walls, industrial facilities — where standard paper posters would degrade within months. The Defib-poster series is designed by medical education experts and combines detailed medical illustration with simple, accessible content specifically calibrated for lay responders who have no clinical background — the target audience for public AED programmes and lay first responder training. Key features of the poster series include high-quality artwork, easy-to-understand content, emphasis on proper emergency protocols, and reinforcement of AED use steps. Positioning this chart near an AED installation or in a public area with AED access provides ongoing visual reinforcement for anyone who passes the AED regularly, creating ambient preparedness awareness between formal training sessions. The Basic Life Support Chart (VR1770UU) by 3B Scientific pairs with this chart to provide complementary CPR and BLS protocol reference at the same training station.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators and training materials to 1,500+ institutions across 28 states in India. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Where should this chart be displayed? A: Near an AED installation, in a public waiting area, canteen, gym, or any high-traffic location where a cardiac emergency could occur. The heavy lamination makes it suitable for permanent display in humid or high-handling environments.

Q: What size is this chart? A: 18" × 23" (approximately 46 × 58 cm), with heavy lamination.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
