Product Description

Upgrade your existing CPR manikin into a smart CPR manikin by using Heartisense™. It controls

up to 6 manikins at a time and enables accurate and effective training and assessment.

- Real-time feedback and a realistic interface
- Perform compressions, ventilations or both
- Digitally saves all training and assessment data

Student app runs on Andriod™ or Apple® tablet or phone and instructor app runs on iPad® or Andriod™ tablet (not included).

Why Choose the Heartisense™ Premium Kit for Your Simulation Lab in India?

The Heartisense™ Premium Kit (Item No. 1022167, MPN: HSG1PR100) is a 0.87 kg app-based CPR feedback sensor kit that converts an existing CPR training manikin into a smart CPR manikin — adding real-time digital feedback, session data recording, and multi-manikin instructor oversight to manikins that currently have no electronic feedback capability. One Premium Kit controls up to 6 manikins simultaneously, enabling an instructor to monitor the CPR quality of up to 6 trainees at once from a single instructor tablet — the group training oversight capability that is otherwise only available with significantly more expensive dedicated electronic feedback manikins. For BLS certification centres, nursing institutes, ACLS training centres, and hospital in-service programmes in India that already own passive CPR manikins and want to add real-time digital feedback without replacing the manikin fleet, the Heartisense™ Premium Kit is the most cost-effective upgrade path available.

The system measures and provides real-time feedback on compressions, ventilations, or both simultaneously — covering the complete CPR quality parameter set. The student app runs on Android™ or Apple® phones and tablets, giving each trainee their own real-time feedback display during practice. The instructor app runs on iPad® or Android™ tablet and consolidates feedback from all connected manikins into a single instructor view, enabling real-time intervention when any trainee's technique falls outside parameters. All training and assessment data is digitally saved during the session, providing an exportable record for competency documentation without manual data entry. Tablets and phones are not included — the kit provides the sensor hardware and app platform; the devices are supplied by the training centre.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators and training technology to 1,500+ institutions across 28 states in India. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: How many manikins can one kit control? A: One Heartisense™ Premium Kit controls up to 6 manikins simultaneously, enabling instructor oversight of 6 trainees from a single instructor tablet.

Q: Which manikins is this kit compatible with? A: The Heartisense™ system is designed to work with existing CPR training manikins. Contact us at sem@semtrainers.com or +91-88495 63724 to confirm compatibility with your specific manikin models before ordering.

Q: Are tablets or phones included? A: No. The student app runs on Android™ or Apple® phones/tablets; the instructor app runs on iPad® or Android™ tablet. Devices must be supplied by the training centre.
