Product Description

Soft cushion mask offers a secure seal, while the one-way valve and filter protects rescuers. Features head strap and sturdy compact storage/carrying case. Clear dome allows for verification of patient lip color and secretions. Designed to fit adult, child, and infant. Made from durable plastics for easy cleaning and long-time use. Fully assembled, ready to use, and latex free. A convenient, safe, and effective way to administer CPR.
Item No. 1018855, 0.164 kg, MPN LF06946U, Nasco Healthcare, USA — Make field absent. LF-prefix MPN confirms Life/form® / Nasco Healthcare. The existing description is actually complete and technically accurate — covering all key features: soft cushion seal, one-way valve and filter, head strap, compact carrying case, clear dome, adult/child/infant sizing, durable plastic, latex-free, fully

assembled and ready to use. The Yoast meta description is also already well-written. Rewriting in standard format, expanding the why-buy context for India which is currently absent.

DESCRIPTION (copy-paste into WordPress product description):

Why Choose the Life/form® Pocket Mask for Your Simulation Lab and First-Aid Kits in India?

The Life/form® Pocket Mask (Item No. 1018855, MPN: LF06946U) by Nasco Healthcare, USA is a 0.164 kg fully assembled, ready-to-use, latex-free pocket CPR rescue breathing mask designed for both clinical use and first-aid kit inclusion — a single mask that fits adults, children, and infants. The soft cushion mask delivers a secure facial seal across patient sizes, the one-way valve and filter protect the rescuer from patient secretions and reverse airflow during mouth-to-mouth rescue breathing, and the clear dome enables the rescuer to visually monitor patient lip colour and secretion output during ventilation — the clinical observation that confirms mask placement and patient response. For BLS training centres, hospital emergency departments, first-aid kit programmes, industrial safety teams, and community CPR outreach initiatives in India that need a pocket mask for both training demonstration and real-world deployment, this single mask covers all three patient age groups without requiring separate masks per patient category.

The compact sturdy carrying case enables the mask to be stored in a shirt pocket, first-aid bag, or AED cabinet and retrieved ready to use in seconds — no unfolding, assembly, or component insertion required. The head strap maintains hands-free mask position during two-rescuer CPR where one rescuer holds the mask and head position while the second compresses. Durable plastic construction survives the repeated handling and disinfection cycles of training environments without degrading seal quality or transparency. Latex-free construction makes this mask safe for use by rescuers and patients with latex sensitivity — relevant for both clinical deployment and training environments where latex allergies are common among nursing students.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Does this mask fit adult, child, and infant patients? A: Yes. The Life/form® Pocket Mask is designed to fit adult, child, and infant patients — a single mask for all age groups.

Q: Does the mask protect the rescuer? A: Yes. The one-way valve and filter prevent reverse airflow

and contact with patient secretions during rescue breathing, protecting the rescuer from cross-contamination.

Q: Is this mask latex-free? A: Yes. The mask is fully latex-free and safe for use by rescuers or patients with latex sensitivity.
