Why Choose the Carrying Bag for Your Simulation Lab in India?

The Carrying Bag (Item No. 1005744 / W44569, MPN: 100-2252U / PP02252U / SB24907U) by Nasco Healthcare, USA is a 0.16 kg genuine OEM transport bag designed for compatible Nasco Healthcare BLS Newborn training manikins, specifically W44570 and W44592. For simulation labs in India that transport newborn CPR manikins between training venues — hospital departments, NRP outreach sessions, community training events, or multi-site nursing programmes — this bag provides a dedicated, correctly sized storage and transport solution for the compatible manikin.

A dedicated carrying bag protects the manikin's external surfaces and internal mechanisms from dust, impact, and handling damage during transport and storage between training sessions. For NRP training centres and nursing institutes running regular newborn resuscitation training across multiple venues, having a correctly fitted carrying bag for each manikin reduces wear and keeps equipment organised and ready for the next session. Only genuine OEM 1005744 bags are dimensioned correctly for the compatible W44570 and W44592 manikins.
