SKU:

Categories:BLS Newborn

Product Description

The comprehensive design of this CPR Infant Manikin allows for practice of Heimlich maneuver and abdominal thrusts, as well as CPR and mouth-to-mouth breathing. Realistic anatomical markings (Adam's apple, carotid arteries, navel, rib cage, chest notch) make it easy to learn correct hand placement for checking pulse, performing chest compressions, and more. Provides valuable student feedback and other important features: • Head tilt/chin lift required to open airway • Proper anatomical landmarks Easy-to-clean heads are dishwasher safe and can easily be sanitized. Lung bags are replaceable. Designed to meet American Heart Association criteria for desirable manikin features.

Packed in a rugged nylon carrying case with a supply of 50 face-shield lung bags and an insertion tool.
Why Choose the CPR Prompt® Infant Manikin (TMAN2) for Your Simulation Lab in India?

The CPR Prompt® Infant Manikin, TMAN2 (Item No. 1018141 / W44714, MPN: LF06002U) by Nasco Healthcare, USA is a 1.45 kg infant CPR training manikin designed to meet American Heart Association criteria for desirable manikin features, with a feature set covering CPR, mouth-to-mouth breathing, and — distinctively — Heimlich manoeuvre and abdominal thrust technique training, which standard ventilation-only infant trainers do not support. For BLS certification centres, nursing colleges, paediatric first-aid training programmes, and NRP/PALS skills labs in India that need to train both choking response (Heimlich/abdominal thrusts) and cardiac arrest response (CPR, rescue breathing) on the same infant manikin, this is the correct platform for combined curriculum delivery.

Realistic anatomical markings — Adam's apple, carotid arteries, navel, rib cage, and chest notch — provide the visual and tactile landmarks trainees need to learn correct hand placement for pulse checking, chest compressions, and abdominal thrust positioning. Head tilt/chin lift is required to open the airway before ventilation succeeds, ensuring trainees practise correct airway positioning technique as a precondition for effective rescue breathing — not an optional step. The easy-to-clean head is dishwasher safe and can be sanitised between trainee uses, supporting hygienic rotation across large class sizes. Lung bags are replaceable consumables. The package includes a rugged nylon carrying case, a supply of 50 face-shield lung bags, and an insertion tool — providing a substantial consumable buffer for repeated training sessions before reordering.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Does this manikin support choking response training? A: Yes. The TMAN2 supports Heimlich manoeuvre and abdominal thrust technique training, in addition to standard CPR and mouth-to-mouth breathing — a combination not present on all infant CPR trainers.

Q: What is included in the package? A: A rugged nylon carrying case, a supply of 50 face-shield lung bags, and an insertion tool. The manikin head is dishwasher safe for hygienic reuse across trainees.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
