Categories:BLS Newborn

Product Description

Professional-quality manikins at a fraction of the cost! Comprehensive design allows for practice of Heimlich maneuver and abdominal thrusts, as well as CPR and mouth-to-mouth breathing. Realistic anatomical markings (Adam's apple, carotid arteries, navel, rib cage, chest notch) make it easy to learn correct hand placement for checking pulse, performing chest compressions, and more. Provides valuable student feedback and other important features: • Head tilt/chin lift required to open airway • Proper anatomical landmarks Ideal for group training, it allows each student to have their own manikin for maximum practice time. Easy-to-clean heads are dishwasher safe and can easily be sanitized. Lung bags are replaceable. Designed to meet American Heart Association criteria for desirable manikin features. Set is packed in a rugged nylon carrying case with a supply of 50 face-shield lung bags and

an insertion tool.

Why Choose the CPR Prompt® Training and Practice Manikin (Infant) 5 Pack for Your Simulation Lab in India?

The CPR Prompt® Training and Practice Manikin, Infant, 5 Pack (Item No. 1017942 / W44711, MPN: LF06050U) by Nasco Healthcare, USA is a 3.43 kg set of five infant CPR training manikins, designed to meet American Heart Association criteria for desirable manikin features — the same comprehensive feature set as the single CPR Prompt® Infant Manikin (TMAN2 / W44714), supplied as a 5-pack for group training environments. For BLS certification centres, nursing colleges, schools, and paediatric first-aid training programmes in India that need to give each trainee their own manikin during a session — maximising hands-on practice time rather than rotating a single manikin through a queue of trainees — this 5-pack is the correct format.

Each manikin in the set supports Heimlich manoeuvre and abdominal thrust technique training alongside CPR and mouth-to-mouth breathing — covering both choking response and cardiac arrest response on the same platform. Realistic anatomical markings — Adam's apple, carotid arteries, navel, rib cage, and chest notch — provide the visual and tactile landmarks for correct hand placement during pulse checking, chest compressions, and abdominal thrusts. Head tilt/chin lift is required to open the airway before ventilation succeeds, reinforcing correct airway positioning as a precondition for effective rescue breathing. Each head is dishwasher safe and easily sanitised between uses, supporting hygienic rotation across class sizes. Lung bags are replaceable consumables. The set is packed in a rugged nylon carrying case with a supply of 50 face-shield lung bags and an insertion tool — providing 10 lung bags per manikin as a working buffer before reordering.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What is the difference between this 5-pack and the single CPR Prompt® Infant Manikin (TMAN2)? A: Both have the same feature set — Heimlich/abdominal thrusts, CPR, mouth-to-mouth breathing, and AHA-compliant design. This 5-pack provides five manikins in one nylon carrying case with 50 face-shield lung bags, suitable for group training where each trainee needs their own manikin. The TMAN2 is sold individually.

Q: How many face-shield lung bags are included? A: 50 face-shield lung bags and one insertion tool are included for the set of five manikins, along with a rugged nylon carrying case.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
